

DESCRIPTION

A small portable table lamp, rechargeable and dimmable, which emits light downward. Consisting of a cylindrical base made of borosilicate glass and a luminous body made of glossy batch-colored ABS. The LED circuit with its transparent protective screen below have been specifically developed by Foscarini to create a maximum lighting radius on the surface below. Light can be set at three levels or switched on/off. The product comes with a USB-C cable for battery charging, charger not included. Packaging box with graphic customization.

MATERIALS

Borosilicate glass, ABS, PMMA

COLORS

burgundy, Sage green, White

technical details

FOSCARINI

Fleur is characterized by an elegant and careful proportion between the two volumes that compose it: the lightness of the transparent glass base that tends to disappear from view is associated with a light body with a strong presence in glossy colored ABS. Sophisticated colors designed to match different surfaces. When Fleur is turned on, the light emphasizes the profile of the glass stem and is diffused on the surface, illuminating the area around its base and at the same time creating a broader luminous radius than traditional battery-powered lamps, thanks to the specially designed LED board. Fleur is also highly efficient: it consumes only 1 Watt, but its LED - quickly rechargeable via USB-C - can express intense, variable light thanks to a touch dimmer.

RODOLFO DORDONI

With an array of activities ranging from architecture, to product design, artistic direction, and the setting up of showrooms and exhibitions, Rodolfo Dordoni has put his name to some of the most significant and famous Italian design projects, including Lumiere:

a contemporary restyling of the classic bedside lamp, made in blown glass and die-cast metal, which has become one of the biggest successes in the Foscarini collection. Again in blown glass, a material capable of conveying emotions of timeless beauty, is the Buds collection.
