

BONALDO

Lake

Designer: Gino Carollo

The concept behind the Lake family of mirrors is the overlapping of different layers that visually create an object with a strong decorative component. The first band, the one that takes up the most space, is composed of the mirror; laid over it is a central band of metal (painted bronze or painted

lead), while the lower band is of glass, in the same finish as the metal. The Lake collection consists of four mirrors, each characterised by a different shape and size.
