

BONALDO

Sculptural

Designer: **Alain Gilles**

Designed by Alain Gilles, this TV stand is a piece with considerable impact even though it has a simple and linear design. Sculptural appears as a single wooden element supported by five legs which form the base. The surface develops in a downward arc while it has a cavity in the rear which is useful for concealing cables, thereby ensuring the

maximum in aesthetic performance. Whether used as a TV stand or a design TV console, placed against a wall under the TV or in the living room in front of a sofa, Sculptural genuinely resembles a sculpture and this is the true stylistic hallmark of this design.
