Zodiac's ZXC Cartridge filter utilises single element cartridges designed to provide optimum filtration. Compact in design and extremely versatile Zodiac's ZXC Cartridge filters are the perfect pool filtration solution providing you with clean, clear water everyday!

ZXC 100 / ZXC 150

Zodiac's ZXC Cartridge filter utilises single element cartridges designed to provide optimum filtration. Compact in design and extremely versatile Zodiac's ZXC Cartridge filters are the perfect pool filtration solution providing you with clean, clear water everyday!

Crystal Clear Water

The ZXC cartridge filter achieves remarkable water filtration and clarity but is also environmentally friendly and responsible.

Cyclonic Filtration

The engineered Cyclonic action pushes the debris towards the walls of the filter and helps clear contaminants quicker, avoiding clogging of the filter element. This in-turn reduces pressure on the water pump leading to increased energy savings.

Smart Efficiency

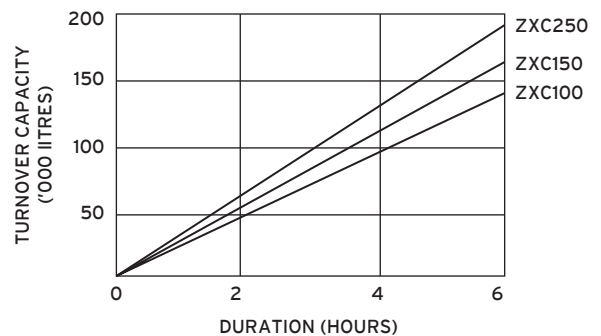

The ZXC cartridge filter reduces maintenance while saving thousands of litres of water every year. It takes just 100 litres of water to clean the elements instead of backwashing thousands of litres to clean a sand filter. The XC cartridge filter makes it easier to be responsible with water.

Warranty
