

Black Tea

Black teas undergo full oxidation, which results in a fuller body, robust tea. Black tea has more caffeine than other teas, yet less than coffee (50-65% of coffee).

All of our decaffeinated teas are produced using the Co2 high pressure decaffeinating process without using any solvent. It is one of the most advanced, environmentally friendly technologies available.

Green Tea

The oxidation process is stopped very quickly by firing (rapidly heating) the leaves. This produces a more subtle flavour and less caffeine content (10-30% of coffee).
