

TUXMAT®

The Ultimate Car Mat

Perfect Fit. Maximum Coverage. Luxurious Finish.

Hello, From the TuxMat® Team,

TuxMat® Inc. is a Toronto based company where we design custom-fit car mats. We use laser scan technology to replicate your car's floor in order to create mats that shield the floor space against foreign debris and natural elements, while giving it some extra spangle. Our top priorities in development are comfort, safety, luxury design, and achieving maximum coverage of the floor space in your vehicle.

At TuxMat, we are everyday drivers, like yourself, who take pride and care in our vehicles. That is why we are so excited to share our product that has redefined a staple car accessory to enhance the driver experience in a newly explored way.

We Want You to Love Your TuxMat!:

Our aim is to deliver you a product that achieves exactly what we promised: The Ultimate Car Mat.

We don't want you to be stuck with a product that you are not 100 percent satisfied with. So if you have any concerns after trying out TuxMat, please let us know, and we will make it right!

Made Just For You

We laser scan vehicles at our Toronto facility in Canada. A mold is made from the initial scanning data for each model, and prototypes are then adjusted for maximum accuracy and coverage. So the set of TuxMat you are purchasing for your vehicle will be a perfect fit.

The TuxMat® System

1. Retention Hook System.

4. Anti-Slip Cloth.
(Bottom layer)

2. PVC Top Layers - 100%
Waterproof and durable.

5. Plastic Side Clips for
Secure Installation.

3. Rubberized Heel Pad
for Drivers Side Mat.

6. Professional finished
edge.

7. TuxMat Seal of Approval.

8. Anti-Slip Ridges.

6 Reasons to Choose TuxMat®

100% Waterproof

Assurance against accidental spills, pet mishaps, snow and rain.

Heavy Duty Heel Pad

Preserves the driver's mat against excess wear and tear.

Retention Hook System

TuxMat's independent retention hook system ensures added security for the driver's mat.

Easy Clean-up

A splash of water and a quick wipe will make your TuxMat new again.

Side Security Clips

Secure TuxMat firmly in place.

Footrest Coverage

Maximum coverage on footrest and back row middle hump.

How TuxMat is Made:

We laser scan vehicles at our Toronto facility in Canada. A mold is made from the initial scanning data for each model, and prototypes are then adjusted for maximum accuracy and coverage. We are always scanning new vehicles and incorporating design ideas from our customers.

Who We Are:

At TuxMat, we are everyday drivers like you. We love our vehicles and spend many hours driving daily between our homes and the office. Our vehicles have in fact become our second homes, and we want to make them as comfortable as possible.

The Problem:

Most of us purchase additional floor mats for our vehicles, because we all know what happens to the floor without them, especially during winter. However, most of the available car mats on the market don't offer the kind of protection we need due to two things. First, they are flat, thus salt stains and dirt still fall onto the carpet. Second, they are universal fit, so there will still be exposed areas catching debris, and unsafe because they will inevitably shift around.

The Solution:

The solution is creating car mats that have vertical walls and custom fitted for each individual car model. The result is a perfect-fit floor mat that offers 100% protection. This idea is not new, other companies have been making good mats based on this concept, but they can be improved on two fronts, coverage and appearance. So we decided to make the ideal car mat ourselves, and TuxMat was born.

Why Choose TuxMat:

TuxMat covers the largest possible carpet area of all vehicles, especially the vertical dimensions. Also, TuxMat is designed to match your vehicle's interior panel texture, so your vehicle's floor will look just as luxurious.
