PRINTER SETTINGS

To ensure sizing accuracy, confirm your printer settings using the guide below. Your Cynthia Gale size chart should be printed on a full letter size paper (8 ½" x 11").

To confirm printer settings, use a ruler to ensure the line below measures 5cm, from point to point.

TO FIND YOUR BRACELET SIZE

- Cut out the ruler on the right and use it to measure around your wrist, near your wrist bone area.
- Take this number and add anywhere from ¼" to ½", depending on your fit preference (loose or snug fit).
- Take the final number and locate the range of sizes it falls between on the right side of the above chart.
- The number on the left side of the chart is your corresponding bracelet size.

Please note that this sizing chart should be used for general guidance.

All Cynthia Gale products involve handmade elements in the production process. As a result, bracelet measurements may differ slightly from one item to another. Each bracelet is sized according to its unique design features. For example, some bracelets are designed to fit more tightly while others will have a looser fit.
