

Sit & Wonder

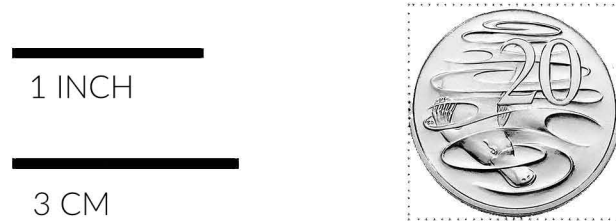

AT-HOME RING SIZING GUIDE

YOU WILL NEED:

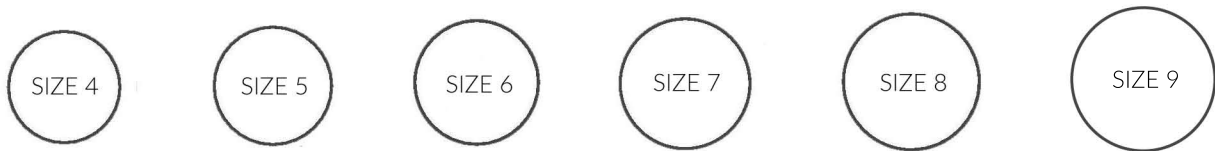

1. A ring that already fits you
2. Access to a printer

METHOD:

1. Print this page on an A4 sheet of paper. Ensure the page scaling option is set to 'none' and reflects the 'Actual size' or '100%'.
2. Check the scaling: You can do this by confirming that the lines below are 1inch or 3cm. OR, if you have an Australian 20 cent coin, see if it sits on top of the image exactly.

3. Place your ring on top of the circles below. The circle that fits just inside the inner edge of the ring is the correct size.

PLEASE NOTE:

Whilst we try to help customers make the best decisions in determining their ring size there may be some discrepancy due to inaccurate measurements. For the most accurate readings you can order our free ring sizer from our website.
