MATERIAL STRENGTH

ABOUT FORTITUDE®

Fortitude is a break-through fabric technology representing a whole new generation of double-sided knitted fabric with high breathability, moisture management and mechanical performance (high strength).

Features

This high performance fabric combines fine merino wool yarn on the fabric back with appropriate polyester yarns for the fabric face in a unique knitted structure to deliver a range of qualities including:

- Superior next-to-skin physiological comfort
- High burst strength
- Excellent breathability
- Good dimensional stability
- Attractive surface texture
- Lively drape
- Superb handle
- Easy care

BREATHABLE

Originally designed for the world's toughest contact sports, **Fortitude** offers high levels of breathability and moisture management.

COMFORTABLE

Fortitude combines the softness and drape of a knit with the stability and strength of a woven fabric, making it extremely versatile.

DURABLE

Engineered to last, **Fortitude** offers an astounding strength-to-weight ratio without compromising comfort or aesthetics.

EASY CARE

Fortitude is machine washable and shrink resistant. Ideal for domestic, commercial and industrial applications.

COLORFAST

Currently available in five colours (red, white, blue, black and gold) **Fortitude** is colorfast and will always look like new.

ANTI-ODOR, ANTI-MICROBIAL

A fine layer of merino worn next to skin provides natural odor resistance. An anti-microbial treatment helps prevent attacks by microorganisms such as bacteria.
