

# Is Your Training Facility Clinically Clean?

**World's Best Disinfectant & Odour Eliminator**

**VITATEK**  
**Solutions**  
HEALTHY CLEANING

**Over 70%**  
of bacteria found on gym  
equipment is potentially  
harmful to humans.

**Fitness facilities are a huge breeding ground for germs.** That's because the bacteria, fungi, and viruses that cause skin infections thrive in the sweat that gets left on exercise equipment and towels, as well as in warm, moist areas such as saunas, showers, and swimming pool decks. Since cardiovascular machines such as treadmills and exercise bikes are used by many people in quick succession and equipment such as dumbbells and exercise mats are passed around - it only takes 1 infected person to potentially expose hundreds to their germs. And bacteria such as MRSA can live for days on exercise machines, mats, and locker-room benches.

**Vital Oxide** kills 99.999% of bacteria, is fragrance-free and non-irritating to the skin. It is an EPA Hospital Grade Disinfectant which eliminates bacteria, mold, mildew and other fungi. Disinfects, eliminates odours and ensures air quality. Safe on most surfaces, including tile, stone, stainless steel, coated wood floors, carpet, upholstery and plastic. Vital Oxide is Health Canada Approved.

## Did you know?

**Free Weights Have 362 More Germs Than a Toilet Seat.**

According to a study conducted by [FitRated.com](https://www.fitrated.com)

**VITAL OXIDE  
Kills 99.999% Of Bacteria  
& Viruses\* Including:**

- STAPH
- MRSA
- E. COLI
- KLEBSIELLA
- RINGWORM
- ATHLETES' FOOT
- NOROVIRUS

## **Infection Control**

Vital Oxide kills 99.999% of bacteria and viruses. It will not allow the development of antimicrobial or antibiotic resistant organisms.

## **Fabric Safe**

Vital Oxide can be used on a wide range of soft surfaces including pet bedding, carpeting, upholstery and curtains. It is proven safe on colourfast fabrics which is why it has been approved by the Carpet and Rug Institute.

## **Certified Clinically Clean**

Wherever you see the Certified Clinically Clean seal you can rest assured the surface you touch and the air you breathe is germ-free and allergy-free. Perfect for your training facilities, equipment, mats, locker rooms, front desk area and so much more.

## **Eco-friendly**

No VOC's, Fragrance free, Hypo-allergenic, non-irritating to the skin, non-corrosive, and food surface safe with no rinse required.

## A Safer Solution

What's in your bottles? Disinfecting & cleaning can involve strong chemicals that may trigger health problems, like chlorine bleach products that produce trihalomethanes (THM) and haloacetic acids (HAAS) which are linked to cancer. These chemicals can also be so harsh that they discolour and degrade the surfaces they are used on. Now there's a safer and ecologically sound alternative. Vital Oxide is colourless, odourless & so mild you can wash your hands in it, and will not harm hard or soft surfaces, or colorfast fabrics. It is environmentally friendly, and it preserves your health & indoor air quality. Experience a healthier & cleaner facility.

**Be a part of the solution,  
make a change for a healthier  
workplace and a healthier  
future.**
