# NATURABUILD

## WHAT IS NATURABUILD?

*Builder in a bottle. Naturabuild is a range of strong base gels that can be used to increase the natural nails ability to grow. The Naturabuild collection comes in sixteen neutral shades.*

*This allows clients to be able to wear the base as a natural overlay or underneath gel paint for extra strength.*

*There is no need for a primer or base gel and its strength allows for a short/ medium extension over a tip. Naturabuild has increased flexibility, meaning your nails are less likely to snap at a healthy length compared to other nail systems. Naturabuild can be removed by soaking or infilled depending on the needs of the client.*

## HOW DO I BEST APPLY NATURABUILD?

*Begin by wiping the prepped nail with acetone. Naturabuild does not like prep scrubs or cleansing wipes.*

*Apply your first thin slip layer and cure for 90 seconds on low heat mode. Apply a second and third layer depending on length and cure for 90s low heat mode.*

*Wipe with acetone and shape and refine. Layers should be built up to avoid heat spikes. Please refer to the application guide for more detailed information.*

## HOW DO I STOP A CLIENTS NATURABUILD FROM LIFTING?

*The nail should be thoroughly prepared and dehydrated using acetone only prior to application. Please make sure there is enough product on the free edge as this can cause lifting.*

## CAN I USE NATURABUILD WITH OTHER GLOSSIFY PRODUCTS?

*Yes, Naturabuild is a builder base coat. You can apply colours over the top after refinement. There is no need to add an extra base coat.*

## CAN I USE OTHER GEL SYSTEMS WITH YOURS?

*No. It is not recommended that you mix gel systems. This can cause a service breakdown and lead to allergies. We do not know how our products work with other brands and it has never been tested.*
