FYI

Taller tiers are a new way to bring more creativity to your cakes. Tall tiers have to be fondant icing because each tall tier has a separation in the middle that gives the cake the support it needs to stand. Having the fondant on there allows you to have all the options for decorations such as a damask pattern, gold painting, gumpaste flowers, and any more.

Taller tiers require fondant, the regular sized and single tiers can be buttercream icing. The combo of buttercream and fondant icings on different tiers looks better when you texture the buttercream cake.

This menu includes cakes that serve 15 - 110 Guests
