## SADDLING YOUR

Correct saddle placement is essential for optimal balance and feel on your Equicizer.

The girth may be placed before or after the stabilization bar depending on the saddle. Typically with Western saddles the girth lies in front of the bar and with English saddles the girth typically lies behind the bar.

### Recommended Girth Sizes:

\* Western Saddles 34" \* English & Exercise Saddles 50-52" \* Dressage 28"-30"
