Outdoor Ambient Flame

OUR STORY

At Lovinflame, we envision a world where people can appreciate the cozy elegance of a flickering flame, while also keeping peace of mind. It took a rocket scientist ten long years to tinker with the intrinsic mechanisms of fire and land on a solution where we wouldn't need to sacrifice health and safety to enjoy the comforting glow of fire. We invite you to join us as we continue innovating and redefining what fire — and ambiance — can be.

OUR TECHNOLOGY

Patented Burning System

Introducing a new category of fire that uses Lovinflame's proprietary stainless steel wick designed to ignite with Lovinflame Fuel — producing vibrant, clean-burning flames that enhance safety and peace of mind.

Lovinflame Fuel

Lovinflame Fuel is water-soluble and ethanol-free. It has a high flashpoint of 104°C / 220°F, igniting when paired with our patented burning system, making it a safer alternative. It is not a DOT (Department of Transportation) controlled material.

SAFE

Minimizes risks associated with flare-ups and fuel spills

CLEAN-BURNING

Virtually emissions-free — emits water vapor & CO2

ODORLESS

Water-soluble fuel produces no odor or smoke while burning

WIND-RESISTANT

Flames don't blow out easily; ideal for outdoor use

PORTABLE

Free-standing and can be used anywhere indoors and outdoors

LONG-LASTING

Patented wick burns for 2,000+ hrs

Watch our vibrant flames in action.
