About the Product

Corsica Granite is a range of specially selected high-quality natural stones with a special protective shield that improves its performance against stains.

Treatment

Corsica Granite comes with a protective treatment called SenGuard® which reduces absorption and thus reduces the stone's susceptibility to staining. SenGuard® is not simply a sealer, it bonds to the surface of the stone differently than conventional sealers. In contrast with sealing products, the treatment allows the granite to breathe, penetrating and anchoring to the structure, conserving its color and natural beauty.

Advantages of SenGuard®

- Water and oil repellent
- Invisible
- No need to re-seal after the initial application
- Chemical bonding to the stone, allowing it to breathe
- Long-lasting
- Unaffected by conventional cleaning products
- No deterioration from UV exposure
- Withstands temperatures of up to 150°C (302°F)

Precautions

- Do not place very hot objects directly onto the stone. The use of a heatproof mat is recommended to avoid marking the stone.
- Any spillage should be cleaned up as quickly as possible.
- Cutting directly on the stone should be avoided, as it may cause scratches.
- Do not use highly abrasive cleaning materials such as metal scourers. Wipe the surface gently to avoid scratching.
- Do not use strongly acidic or basic cleaning products, as they may damage the surface.

Maintenance

To keep the surface of the stone like new, it must be cleaned regularly using a few drops of a neutral cleaner or a gentle washing-up liquid. The best results are obtained wiping gently with a cloth dipped in warm water to avoid scratching the stone. After cleaning, rinse with water and dry the surface.
