

Android® Re-pairing Procedure

Unexpected Bluetooth behavior such as loss of phone call or text notifications, disconnects, intermittent connectivity, or a lost connection may result in the need to re-pair your GO! and your smart phone. You should re-pair your GO! device using the Soleus GO! App and not in your Android device Bluetooth settings. These procedures will help.

1. Sign out of the App

SOLEUS GO! Android® Re-pairing Procedure

2. Turn off the Bluetooth on your GO!

A constant or blinking Bluetooth icon means that GO!'s Bluetooth is turned ON

No Bluetooth icon means that GO!'s Bluetooth is turned OFF

SOLEUS GO!

Android® Re-pairing Procedure

3. Re-pair GO! with your smart phone
