Retractable Cargo Cover for Tesla Model Y
Installation Instructions

The EVANNEX Retractable Cargo Cover for Model Y has been designed specifically for Model Y and may be used to hide items in the cargo area from view.

An Installation Video can be found at evannex.com

Quick Start Installation Steps:

The EVANNEX Retractable Cargo Cover for Model Y is relatively easy to install and requires no tools.

Step 1. Locate the proper cargo space side position for the front (top photo, right) and rear (second photo, right) attachment mounts. IMPORTANT: Test fit into place BEFORE you remove the red adhesive backing.

Step 2. Beginning with the rear attachment mounts, remove the red adhesive backing from the rear of the mount, pull back the OEM rubber insulation seal, and press the mount into place (see photos below).

Step 3. At the proper location for the front attachment mounts, slide the rear safety belt through the slot as shown in the photo (below, left). IMPORTANT: Be sure the safety belt slides through the opening without any impingement.

Step 4. Press the front attachment mount into place and repeat for the other side.

Step. 5. Pull back the spring-loaded ends of the frame and push into place for the front attachment mounts on the driver and passenger sides.
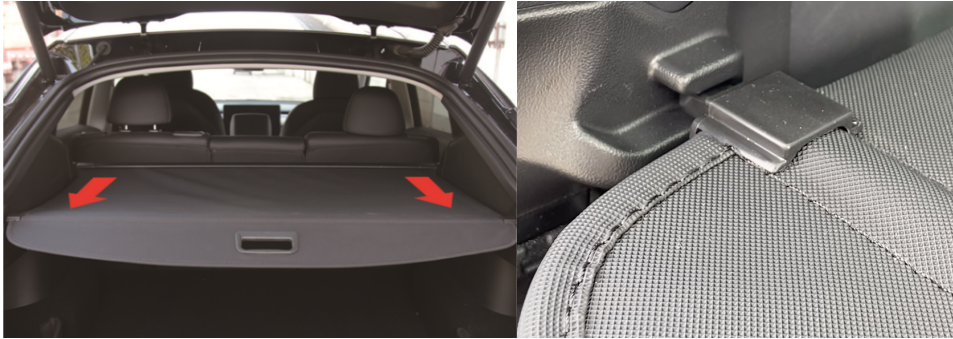

All attachment mounts are now attached and in place.

Step 6. Pull the cargo cover out of the frame using the pull tab (photo below, left) and once extended slightly past the attachment mount, insert the pull tab end extension into the mount slot as shown in the photo below right.

Your Retractable Cargo Cover installation is now complete.
