

## INSTALLATION INSTRUCTIONS

### Tempered Glass Screen Protector for Model 3 and Model Y

Please read these Installation Instructions **BEFORE** you install the Tempered Glass Screen Protector for Model 3 and Model Y.

The EVANNEX Tempered Glass Screen Protector for Model 3 has been designed exclusively to protect your Display Screen. The EVANNEX Tempered Glass Screen Protector for Model 3 and Model Y is a simple DIY project. However, if you're uncomfortable with the installation for any reason, we recommend you contact a professional installer and have them do the installation for you.

An installation video is available at [evannex.com](http://evannex.com).

#### INSTALLATION

**WARNING:** The EVANNEX Tempered Glass Screen Protector for Model 3 and Model Y is made of tempered glass and will not shatter. There is no need to bend the tempered glass screen protector during installation. Bending the glass may break it. **DO NOT bend the tempered glass screen protector!**

**Step 1. Wash and dry your hands before starting.**

**Step 2. Make sure your HVAC system is turned off and all windows are closed.** Dust is your enemy, so you must minimize it. Please keep kids and pets out of the area.

**Step 3. Move your Tesla into indirect sunlight to help spot the aforementioned dust and smudges.**

**Step 4a. Put your display in "Screen Cleaning" mode.** Car icon → Display → 'Screen Clean Mode'

**Step 4b. Clean the screen before starting.** Use a 40% isopropyl alcohol-60% water mixture applied with a lint free cloth (microfiber works well). This step is critical!

**Step 5. Once you've cleaned the screen and allowed it to dry, look very carefully for small specs of dust and remove them using the adhesive pad included with the screen protector.** If you've lost the adhesive pad, you can use Scotch Magic Tape. The intent here is to remove specs of dust before they become trapped under the screen protector.

**Step 6. Once you're satisfied the screen is clean, remove the clear protective film which protects the display-facing surface of the screen protector.** Use the small white tab to pull it off. **DO NOT touch the exposed surface with your fingers or allow it to come into contact with any dust or dirt!**

**Step 7. Holding ONLY the edges of the screen protector, align the top of the screen protector with the top of the screen. At the same time, align the left and right sides of the screen protector with the screen edges. Do NOT bend the screen protector as you apply it.**

**Step 8. Use a lint free cloth to both clean and press the screen protector into place.** . If any air bubbles appear, work them outward toward the edges of the screen protector using the cloth.

*Your EVANNEX Tempered Glass Screen Protector for Model 3 or Model Y is now installed!*
