

## WIRED GAME CONTROLLER FOR TESLA OWNERS

As you may know Tesla vehicles offer a variety of built-in games in the infotainment entertainment section. Some of these games can be controlled with the car's built-in steering wheel, but some require that you connect a controller.

The EVANNEX Wired Game Controller has been designed to work with all Tesla Vehicles, you'll be able to use it in your Tesla by simply plugging it up to the car's center console USB ports or using the provided USB-C adapter for Vehicles with USB Type-C ports.

The EVANNEX game controller includes a 3.5mm Headphone Jack, built-in dual motors, with dual vibration function, for a more realistic gaming experience. 5'5 Ft wired USB cord for a more reliable connection. An Ergonomic design and lightweight construction make it great for long hours of gaming.

**Easy to install, just plug and play.**

Note: All the lights in the controller will turn on once properly connected.
