

EASILY MEASURE YOUR RINGSIZE

STEP 1

Scale this pdf to 100% and print it on A4 size paper (297x210mm)

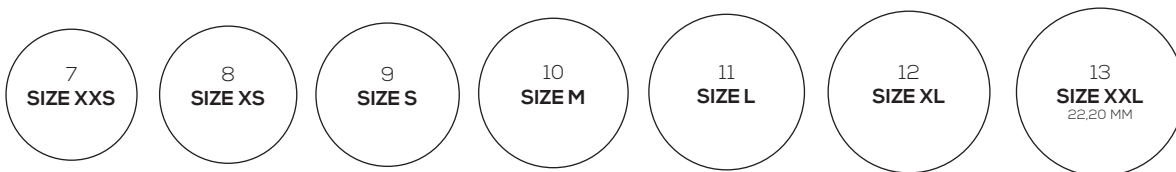

STEP 2

Place a credit card on the line above and proceed to option 1 if it matches the length. If not, check your printer settings at step 1.

OPTION 1

USE YOUR CURRENT RING

1. Place your own ring on the circles below.
2. Line your ring with one of the circles listed below. Do this as accurately as possible. The inner edge of your ring should align with the outer edge of the circle.
3. If your ring fits in two circles, we recommend you to choose the larger size.

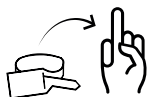

OPTION 2

USE THE RING SIZER

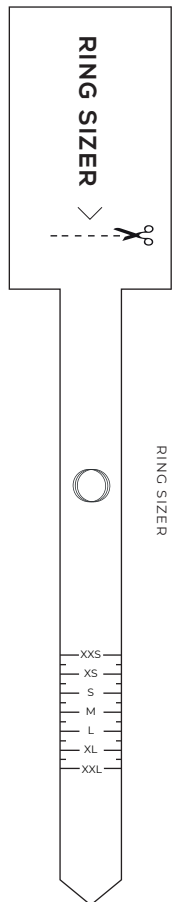

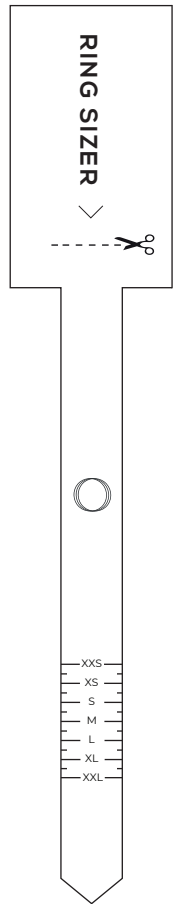

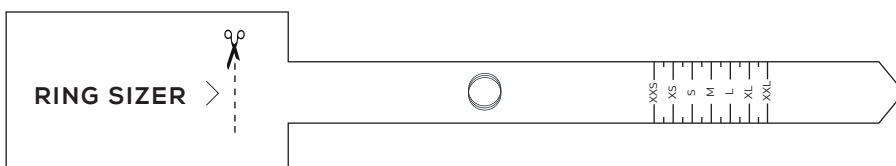

Cut out the sizer below. Make a small split at the scissors icon.

Wrap the sizer around the finger where you want to wear the ring. Make sure the letters are visible.

Slide the arrow shape through the split and pull it tightly. The letter closest to the split is your ring size.

TWO EXTRA SIZERS
