

RollerMouse Pro3

Improved comfort and control

A modern upgrade to the Pro2, RollerMouse Pro3 is an ergonomic mouse designed for demanding tasks that require repetitive movements. Pro3 is a great option for anyone who uses a mouse for long periods every day.

Sitting below the keyboard, RollerMouse Pro3 eliminates the need to reach for the mouse, lessening stress from the neck to the fingers.

The width of this RollerMouse makes it especially suitable for standard or full-size keyboards for comfortable typing. RollerMouse Pro3 allows you to work faster, and more comfortably..

Personalised features

Five centrally-located buttons come pre-programmed to perform everyday, common mouse functions including copy, paste and a 'one-touch' double-click; these buttons can be customised to perform shortcuts. The cursor speed, scroll wheel and rollerbar can also be customised. The cursor speed button allows users to choose from ten speeds.

A new look and feel

A sturdier, aluminum base reduces risk of slipping and provides more durability. Premium leatherette padding runs the full length of the unit, offering extra wrist support.
