

RollerMouse Free3

Wired and Wireless

Sleeker. Faster. Freer.

A modern upgrade to the Free2, the Free3 brings the same ergonomic design and quality, with the added benefits of more speed, more buttons, better precision and optional wireless technology.

Natural feel, natural movement.

An advanced sensor located underneath the rollerbar allows for more precise cursor movements without changing the feel.

Slimmest design, still.

At 23mm high, the Free3 low profile helps to maintain a proper, ergonomic position.

Usability.

The built in wrist rest has more padding for increased comfort. The rollerbar has more room to move with 357mm of bar access. Free3 is ideal for a variety of hand and body sizes.

Speed without compromise.

Ten speeds range between 600 and 2800 dpi, allowing the cursor to move quicker and easier across multiple monitors or large screens.

New features for a modern take.

The Free3 has two new buttons for forward and back to be used in most internet browsers, It also has a sturdier, aluminium base and a softer click.
