

Newtral Mouse

Ergonomic grip design

The concave depression on the thumb side of the mouse combined with the downward slope towards the fifth finger positions, delivers a more natural position for users wrists and forearms. Hands rest on the mouse instead of holding, reducing hand fatigue and strain.

Ergonomic comfort without sacrificing efficiency

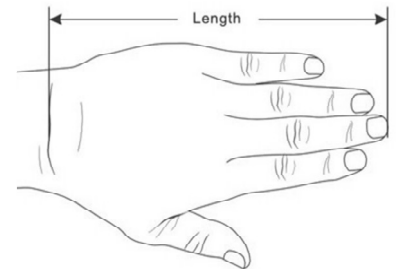

The Newtral mouse comes with two interchangeable fittings, Ergo-Grip and Precision Grip, for a ergonomic fit and feel. Ergo-Grip offers maximum ergonomic comfort, Precision Grip delivers the utmost in fingertip control.

One size does not fit all

Multiple sizes available to ensure optimal ergonomic posture
