

APOLLO

Apollo modular rack and attachments.

Product description:

The Apollo Modular rack is a great piece of equipment perfect for any gym or commercial facility. It comes equipped with two heavy duty power racks along with a wide storage area which is perfect for storing weight plates, medicine balls and kettlebells etc. Along with this, these modular racks come equipped with pull up bars which run along the top of the power racks.

These Apollo modular racks are crafted from steel and iron and are finished with a powder coating to prevent chipping and general damage in the long run. This rack also fits numerous attachments such as our home brand Apollo landmine, dipping bar, step platform and customised name plates. As a whole this modular rack would be well suited to any gym and is perfect for all sorts of strength exercises from squats and bench press to overhead press and rack pulls.
