

EG Series

Automatic Control Systems

Overview

Futura has developed a cost effective machine control series that has been in the market for 8 years around the globe and we continue to expand it's place in the 2D market.

Feature Summary

The **EconoGrade Series** currently consists of two levels:

- » EG1 System with plastic housing control box
- » EG1-M System with the same features and functionality of the EG1 with a rugged metal control box
