## Introduction

$\triangle$
The safety instructions and the user manual should be read through carefully before the product is used for the first time.
The person responsible for the product must ensure that all users understand these directions and adhere to them.

The symbols used have the following meanings:

## 4 warning

Indicates a potentially hazardous situation or an unintended use which, if not avoided, will result in death or serious injury.

## $\triangle$ caution

Indicates a potentially hazardous situation or an unintended use which, if not avoided, may result in minor injury and/or appreciable material, financial and environmental damage.

Important paragraphs which must be adhered to in practice as they enable the product to be used in a technically correct and efficient manner.

## Overview

## Basic measuring screen

Selection screen

## Pointfinder (Viewscreen)

## Insert batteries

To ensure a reliable use, do not use zinccarbon batteries. We recommend using high quality batteries.
Change batteries when battery symbol is flashing.

Switching ON/OFF

Device is turned OFF.

Clear
If no key is pressed for 180 sec, the device switches off automatically.

Multifunctional endpiece

Leave actual function, go to default operation mode.

## Message Codes

If the info icon appears with a number, observe the instructions in section "Message Codes". Example:

> The orientation of the endpiece
> is automatically detected and the zero point is accordingly adjusted.

## Permament / Minimum-Maximum measuring

Stops permanent / minimummaximum measuring.

## Add / Subtract

This process can be repeated as required. The same process can be used for adding or subtracting areas or volumes.

## Pointfinder (Viewscreen)

Exit pointfinder (viewscreen).

This is a great help for outdoor measuring. The integrated pointfinder (viewscreen) shows the target on the display.
The device measures in the middle of the cross hair, even if the laser dot is not visible.
Parallax errors occur when the pointfinder camera is used on close targets, with the effect that the laser appears displaced in the crosshair. In this case rely on the real laser dot.

Overview

| UNIT | Tilt units |
| :---: | :---: |
| $\frac{1141 \mathrm{INII}}{\text { UNIT }}$ | Distance units |
| Jf | Beep |
| N1 | Digital level |
| ? | Keypad lock |
| * | Bluethooth ${ }^{\text {® }}$ |
| 岳 | Tilt calibration |

| 1 | Information |

## Tilt units

## inimi Distance units

Confirm setting.

Exit settings.

## 프 Digital level ON/OFF

To switch ON,

The digital level
is displayed in the status bar.

Switch on Bluetooth ${ }^{\circledR}$ Smart in Settings.
Connect the device with your smart phone, pad, laptop,.
The actual measurement is transferred automatically if Bluetooth ${ }^{\circledR}$ connection is established. To transfer a result from the main line, press = Bluetooth ${ }^{\circledR}$ switches off as soon as the laser distance meter is switched off.
The efficient and innovative Bluetooth ${ }^{\circledR}$ Smart module (with the new Bluetooth ${ }^{\circledR}$ standard V4.0) works together with all Bluetooth ${ }^{\circledR}$ Smart Ready devices. All other Bluetooth ${ }^{\circledR}$ devices do not support the energy saving Bluetooth ${ }^{\circledR}$ Smart Module, which is integrated in the device.

To switch ON, repeat procedure.

ใ De-/Activate keylock
To To deactivate, repeat
 procedure. The keylock is active if device is switched off.

* De-/Activate Bluetooth ${ }^{\circledR}$ Smart

## Switch on with keylock

Exit settings.

## Default mode:

Bluetooth ${ }^{\circledR}$ is switched on.
Bluetooth ${ }^{\circledR}$ icon in status line is displayed if device is connected with Bluetooth ${ }^{\circledR}$.

## 踾 Calibration of tilt sensor (Tilt Calibration)

Turn the device horizontally by $180^{\circ}$ and place it again on absolutely flat surface.

Place device on absolutely flat surface.

> After 2 sec the device goes back to the basic mode.

Personalized favorites

Select favorite function.
 key left or right. Function is set as favorite above the corresponding selection key.

Select your favorite functions for quick access.

## Short cut:

Press 2 sec on a selection-key in the measuring mode.

- Illumination

Confirm setting.

Exit settings.

To save
1 power reduce brightness if not necessary.

Off

## © Reset

Second confirmation with selection keys:

Approve value.

Adjust digit.

Exit settings.

Reset returns the instrument to the factory settings. All customized settings and memories are lost.

## Overview

|  | \% | Timer |
| :---: | :---: | :---: |
|  |  | Calculator |
|  | - | Adjusting measuring reference |
|  | \% | Memory |
|  | OIST | Single Distance Measurement |
|  | $\square$ | Smart Horizontal Mode |

| $\stackrel{\text { a }}{ } \times$ | Inclination Tracking |
| :---: | :---: |
| $\rangle$ | Area |
| $\checkmark$ | Volume |
| $\triangle$ | Triangle area |
| 相 | Long Range Mode |
| P0. ${ }^{p_{x}}$ | Height-profile Measurement |

| -4 | Measuring on sloped objects |
| :---: | :---: |
| - ${ }^{\text {Pra }}$ | Height Tracking |
| $\square$ | Trapezium |
| $\frac{p p}{p p}$ | Stake out |
| \% | Pythagoras I |
| $\bigcirc$ | Pythagoras 2 |

(3) Timer

The self release starts if
ON/Measure
key is pressed.
Confirm setting.

The measurement result from the main line is taken over to the calculator and can be used for further calculations.
Ft /in fractions are converted into $\mathrm{ft} / \mathrm{in}$ decimal.

## 1f Adjusting measuring reference/tripod

## シ Memory

## 组 Measuring single distance

## Target surfaces:

Measuring errors can occur when measuring to colourless liquids, glass, styrofoam or semi-permeable surfaces or when aiming at high gloss surfaces. Against dark surfaces the measuring time increases.

## $\measuredangle$ Smart Horizontal Mode

 tilt of $\pm 10^{\circ}$ )

Ł Inclination tracking

Aim laser at first target point.

Aim laser at second target point.

The result is shown in the main line and the measured value above.
1 Partial Measurements / Painter function: Press - or - before starting the first measurement. Measure and add or subtract distances. Finish with $=$. Measure 2nd length.

## Volume

Aim laser at second target point.

Aim laser at third target point.

## $\triangle$ Triangular area

*t Long range mode

The long range mode allows measuring of difficult targets in unfavorable conditions e.g. bright ambient light or bad target reflectivity. The measuring time is increased.
An icon in the status line shows if the function is active.

## Height-profile measurement

## \$ Sloped objects

Aim laser at upper target point.

Aim laser at lower target point.

Included angle between both points

Horizontal distance between both points

Indirect distance measuring between 2 points with additional results. Ideal for applications such as length and slope of roof, height of chimneys,
It is important, that the instrument is positioned in the same vertical plane as the 2 measured points. The plane is defined of the line between the 2 points.

## Height tracking

## [. Trapezium

Aim laser at 2nd point.

## 哲P Stake out

$\nabla$ Pythagoras (2-point)
 target.

Aim laser at second target.

The result is shown in the main line.
Pressing the measuring key for 2 sec in the function activates automatically Minimum or Maximum measurement.

We recommend to use the pythagoras only for indirect horizontal measuring.
For height measuring (vertical) it is more precise to use a function with the inclination measuring.

## $\nabla$ Pythagoras (3-point)

## Distance measurement

| Typical Measuring Tolerance* | $\pm 1.0 \mathrm{~mm} / \sim 1 / 16^{\prime \prime}$ *** |
| :---: | :---: |
| Maximum Measuring Tolerance** | $\pm 2.0 \mathrm{~mm} / 0.08$ in $* * *$ |
| Typical Range* | $200 \mathrm{~m} / 660 \mathrm{ft}$ |
| Range at unfavourable condition **** | $80 \mathrm{~m} / 260 \mathrm{ft}$ |
| Smallest unit displayed | $0.1 \mathrm{~mm} / \mathrm{l} / 32 \mathrm{in}$ |
| Power Range Technology ${ }^{\text {TM }}$ | yes |
| $\varnothing$ laser point at distances | $\begin{aligned} & 6 / 30 / 60 \mathrm{~mm} \\ & (10 / 50 / 100 \mathrm{~m}) \end{aligned}$ |
| Tilt measurement |  |
| Measuring tolerance to laser beam***** | $\pm 0.2^{\circ}$ |
| Measuring tolerance to housing***** | $\pm 0.2^{\circ}$ |
| Range | $360^{\circ}$ |
| General |  |
| Laser class | 2 |
| Laser type | $635 \mathrm{~nm},<1 \mathrm{~mW}$ |
| Protection class | IP65 (dust tight and jet water protected) |
| Autom. laser switch off | after 90 s |
| Autom. power switch-off | after 180 s |
| Bluethooth® Smart | Bluethooth v4.0 |
| Range of Bluethooth ${ }^{\text {® }}$ | 10 m |
| Battery durability ( $2 \times \mathrm{AA}$ ) | up to 5000 measurements |
| Dimension ( $\mathrm{H} \times \mathrm{D} \times \mathrm{W}$ ) | $\begin{aligned} & 143 \times 58 \times 29 \mathrm{~mm} \\ & 5.6 \times 2.28 \times 1.14 \mathrm{in} \end{aligned}$ |
| Weight (with batteries) | $198 \mathrm{~g} / 6.37 \mathrm{oz}$ |
| Temperature range: <br> - Storage <br> - Operation | $\begin{aligned} & -25 \text { to } 700^{\circ} \mathrm{C} \\ & -13 \text { to } 158{ }^{\circ} \mathrm{F} \\ & -10 \text { to } 500^{\circ} \mathrm{C} \\ & 14 \text { to } 122{ }^{\circ} \mathrm{F} \end{aligned}$ |

* applies for $100 \%$ target reflectivity (white painted wall), low background illumination, $25^{\circ} \mathrm{C}$
** applies for 10 to $100 \%$ target reflectivity, high background illumination, $-10^{\circ} \mathrm{C}$ to $+50^{\circ} \mathrm{C}$
*** Tolerances apply from 0.05 m to 10 m with a confidence level of $95 \%$. The maximum tolerance may deteriorate to
$0.1 \mathrm{~mm} / \mathrm{m}$ between 10 m to 30 m , to $0.20 \mathrm{~mm} / \mathrm{m}$ between 30 m to 100 m and to $0.30 \mathrm{~mm} / \mathrm{m}$ for distances above 100 m **** applies for $100 \%$ target reflectivity, background illumination of approximately 30 '000 lux
***** after user calibration. Additional angle related devia-
tion of $+/-0.01^{\circ}$ per degree up to $+/-45^{\circ}$ in each quadrant. Applies at room temperature. For the whole operating temperature range the maximum deviation increases by $+/-0.1^{\circ}$.

For accurate indirect results, the use of a tripod is recommended. For accurate tilt measurements a transverse tilt should be avoided.

## Functions

## Message Codes

If the message Error does not disappear after switching on the device repeatedly, contact the dealer.
If the message InFo appears with a number, press the Clear button and observe the following instructions:

| No. | Cause | Correction |
| :--- | :--- | :--- |
| $\mathbf{1 5 6}$ | Transverse tilt greater <br> than $10^{\circ}$ | Hold the instrument <br> without any transverse tilt. |
| $\mathbf{1 6 2}$ | Calibration mistake | Make sure, the device is <br> placed on a absolutely <br> horizontal and flat surface. <br> Repeat the calibration <br> procedure. If the mistake <br> still occurs, contact your <br> dealer. |
| $\mathbf{2 0 4}$ | Calculation error | Perform measurement <br> again. |
| $\mathbf{2 4 0}$ | Data transfer error | Repeat procedure. |
| 252 | Temperature too high | Let device cool down. |
| 253 | Temperature too low | Warm device up. |
| 255 | Received signal too <br> weak, measuring time <br> too long | Change target surface <br> (e.g. white paper). |
| 256 | Received signal too <br> high | Change target surface <br> (e.g. white paper). |
| 257 | Too much back- <br> ground light | Shadow target area. |
| 258 | Measurement outside <br> of measuring range | Correct range. |
| 260 | Laser beam inter- <br> rupted | Repeat measurement. |

## Care

- Clean the device with a damp, soft cloth.
- Never immerse the device in water.
- Never use aggressive cleaning agents or solvents.

## Warranty

## Lifetime Manufacturer's Warranty

Warranty coverage for the entire usage time of the product according to Leica Geosystems International Limited Warranty. Free of charge repair or replacement for all products that suffer defects as a result of faults in materials or manufacturing, for the entire life of the product.

## 3 Years no Cost

Guaranteed service should the product become defective and require servicing under normal conditions of use, as described in the user manual, at no additional charge.

To receive the " 3 years no cost" period, the product must be registered at www.leicageosystems.com/registration within 8 weeks of the purchase date. If the product is not registered, a " 2 years no cost" period applies.

## Safety Instructions

The person responsible for the instrument must ensure that all users understand these directions and adhere to them.

## Areas of responsibility

## Responsibilities of the manufacturer of the original equipment:

Leica Geosystems AG
Heinrich-Wild-Strasse
CH-9435 Heerbrugg
Internet: www.disto.com
The company above is responsible for supplying the product, including the User Manual in a completely safe condition.
The company above is not responsible for third party accessories.

## Responsibilities of the person in charge of the instrument:

- To understand the safety instructions on the product and the instructions in the User Manual.
- To be familiar with local safety regulations relating to accident prevention.
- Always prevent access to the product by unauthorised personnel.

## Safety Instructions

## Permitted use

- Measuring distances
- Tilt measurement
- Data transfer with Bluetooth ${ }^{\circledR}$

Prohibited use

- Using the product without instruction
- Using outside the stated limits
- Deactivation of safety systems and removal of explanatory and hazard labels
- Opening of the equipment by using tools (screwdrivers, etc.)
- Carrying out modification or conversion of the product
- Use of accessories from other manufacturers without express approval
- Deliberate dazzling of third parties; also in the dark
- Inadequate safeguards at the surveying site (e.g. when measuring on roads, construction sites, etc.)
- Deliberate or irresponsible behaviour on scaffolding, when using ladders, when measuring near machines which are running or near parts of machines or installations which are unprotected
- Aiming directly in the sun

## Hazards in use

## $\triangle$ warning

Watch out for erroneous measurements if the instrument is defective or if it has been dropped or has been misused or modified. Carry out periodic test measurements. Particularly after the instrument has been subject to abnormal use, and before, during and after important measurements.

## - caution

Never attempt to repair the product yourself. In case of damage, contact a local dealer.

## $\triangle$ warning

Changes or modifications not expressly approved could void the user's authority to operate the equipment.

## Limits of use

i Refer to section "Technical data".
The device is designed for use in areas permanently habitable by humans. Do not use the product in explosion hazardous areas or in aggressive environments.

## Disposal

## $\triangle$ CAUTION

Flat batteries must not be disposed of with household waste. Care for the environment and take them to the collection points provided in accordance with national or local regulations.
The product must not be disposed with household waste.
Dispose of the product appropriately in accordance with the national regulations in force in your country.

Adhere to the national and country specific regulations.
Product specific treatment and waste management can be downloaded from our homepage.

## Electromagnetic Compatibility (EMC)

## $\triangle$ warning

The device conforms to the most stringent requirements of the relevant standards and regulations.
Yet, the possibility of causing interference in other devices cannot be totally excluded.
Use of the product with Bluetooth ${ }^{\circledR}$

## $\triangle$ warning

Electromagnetic radiation can cause disturbances in other equipment, in installations (e.g. medical ones such as pacemakers or hearing aids) and in aircraft. It can also affect humans and animals.

## Precautions:

Athough this product conforms to the most stringent standards and regulations, the possibility of harm to people and animals cannot totally excluded.

- Do not use the product near petrol stations, chemical plants, in areas with a potentially explosive atmosphere and where blasting takes place.
- Do not use the product near medical equipment.
- Do not use the product in airplanes.
- Do not use the product near your body for extended periods.

## Laser classification

The device produces visible laser beams, which are emitted from the instrument:
It is a Class 2 laser product in accordance with:

- IEC60825-I : 2014 „Radiation safety of laser products"

## Laser Class 2 products:

Do not stare into the laser beam or direct it towards other people unnecessarily. Eye protection is normally afforded by aversion responses including the blink reflex.

## $\triangle$ warning

Looking directly into the beam with optical aids (e.g. binoculars, telescopes) can be hazardous.

## $\triangle$ caution

Looking into the laser beam may be hazardous to the eyes.

| Description | Value |
| :--- | :--- |
| Wavelength | $620-690 \mathrm{~nm}$ |
| Maximum radiant output <br> power for classification | $<1 \mathrm{~mW}$ |
| Pulse repetition frequency | 320 MHz |
| Pulse duration | $>400 \mathrm{ps}$ |
| Beam divergence | $0.16 \times 0.6 \mathrm{mrad}$ |

## Labelling

Subject to change (drawings, descriptions and technical data) without prior notice.

Leica Geosystems AG, Heerbrugg, Switzerland has been certified as being equipped with a quality system which meets the International Standards of Quality Management and Quality Systems (ISO standard 9001) and Environmental Management Systems (ISO standard 14001).

Total Quality Management - Our commitment to total customer satisfaction. Ask your local Leica Geosystems agent for more information about our TQM program.
