5. Transmitter Enhancements*

5.1	Current Direction™ (CD)	Provides current direction (CD) signals to enable the locator to differentiate individual utilities
5.2	iLOC™	Allows remote control of the transmitter from a compatible locator, up to 450m (1400 feet) away ¹ (Tx-5B and Tx-10B)
5.3	SideStep™	Shifts the locate and transmitter frequency by several Hz, out of the bandwidth of other locate signals that may be interfering with the locate (Tx-5B and Tx-10B)
5.4	SideStep Auto	Automatically selects the best frequency to use based on the load impedance (works only a direct connect mode)
5.5	Fault Find	Enables the use of an accessory A-Frame with a compatible locator to detect and pinpoint pipe's coating and insulation faults and cable's sheath fault
5.6	Boost	Sets the transmitters to output its maximum output power indefinitely or for a predefined period of time
5.7	Maximum Voltage Selection	Allow the user to increase the voltage, and the current, output to a maximum of 90 Vrms
5.8	Eco Mode	Automatically reduces the output power to allow full depletion of the alkaline batteries. An audio and visual warning provides user feedback (only available with alkaline batteries)
5.9	Power Selector	Restricts the power output of the transmitter to a predefined level
5.10	Automatic overvoltage protection system	In the event of an erroneous direct connection to a high voltage line (up to 250V), a warning symbol is displayed advising the operator to take action

All specifications are measured in test conditions, at 21°C / 70°F

¹ Tested with clear line-of-sight. Range is dependent on electrical environment and weather conditions. For optimum range, face the locator toward the transmitter and raise the transmitter 2' / 60cm from the ground.

² To provide repeatable measurements, run-time is measured at 7W and 20C.

³ Water projected by a nozzle at a pressure of 30kPa / 0.3 bar / 4.4 psi in accordance with BS EN 60529 1992 A2 2013

⁴ At very low temperatures, battery life will be degraded, LCD screen performance may slow and measurement precision may be reduced
