

# Aurora Shoe Care and Repair

*While no shoe lasts forever, with proper care and periodic repair, Aurora Shoes can offer you many years of comfort. Here are some tips to keep your footwear looking good and feeling even better.*

## Avoid Extreme Heat

Your Aurora Shoes have Vibram® Evaflex soles which can be damaged by exposure to concentrated heat or extreme temperatures. Keep Aurora Shoes away from campfires, fireplaces, and indoor radiators. If your shoes become wet, allow them to air dry slowly, away from direct heat.

## Renew or Replace Worn Soles

If your unique gait causes your soles to wear unevenly, return them for repair promptly to ensure your feet remain correctly supported and balanced.

Shoes that are ready for repair have retained their softness and are free of cracks in the leather.

## Clean and Protect

Scuff marks are easily removed with a damp soft cloth. Try soap and water or a mild leather cleaner to remove stubborn stains.

Our leather uppers are vegetable re-tanned and hand glazed using a blend of natural oils. This formula allows our shoes to withstand repeated wettings and stay dry and soft.

Eventually your shoes will need to be replenished with oils to keep the leather from drying and cracking. Most any leather conditioner will do the trick. We recommend that you stick to a natural formula that contains any of the following active ingredients: neatsfoot oil, lanolin, mink oil, or pressed lard oils.

## Our Guarantee

At Aurora Shoe we stand behind every pair of shoes we make. If you are not happy with your Aurora Shoes for any reason, send them back to us. As long as your shoes are in like new condition we will refund your purchase price, no questions asked.

If you find your shoes to have any material or workmanship defects please send them back within 6 months of your purchase. We'll work with you to determine whether we should repair, replace or refund your purchase.
