

Adventure Skottle Grill LEG Extenders

The **Adventure Skottle Leg Extenders** are for extending the existing grill's legs one inch longer. This will allow adequate room under the stove for the use of a 11b green propane bottle.

How to install the Leg extenders:

Supplied: 3 leg extenders

- 1: remove the current leg caps. Use a dowel rod or long metal rod to push the caps off the end of the leg.
- 2: place the leg extender part onto the end of the leg. Using a rubber mallet, drive the extenders into place. It will be a permanent installation.
- 3: the Skottle legs are now ready to be used.
- 4: the included Propane Gas Adapter is to be used between the Kovea Stove and the 11b propane bottle.

Pro tip:

- 1: Should you need to remove the leg extenders: use a metal rod to tap out the leg extenders.
- 2: Should the leg extenders slip out or is not retained by the leg: apply a small amount of glue and tap the extenders back into place.
