

How to install the Skottle Grill Stove Bracket

In order to use the new **Kovea Scout burner**, a bracket will be needed. The bracket is included with every Skottle Grill Kit.

In the box you will find Skottle Grill instructions, a stove bracket, five eye bolts & a gas adapter.

- 1: Turn the Skottle Pan upside down with the burner cage exposed.
- 2: place the **stove** in the **burner cage** with the control knob in the center of the opening.
- 3: Place the **bracket** around the back side of the stove
- 4: Install the **eye bolts** through the bracket and into the cage.
- 5: Use the attached eye bolt **nuts** to hand tighten the adapter in place.
- 6: Should the stove rattle with the bracket in place; loosen the eye bolts nuts and gently squeeze bracket to put pressure on the stove and retighten the eye bolt nuts.
