

## *Teak furniture*

Our teak range comes without any finish or protective treatment. The wood is merely polished, allowing the natural oils to rise to the surface. The high density of teak wood has the advantage that stains stay on the surface and do not penetrate the wood easily. Even with these characteristics, spills should be removed immediately.

### PREVENTIVE TREATMENT

- If you want to protect the wood from the start, apply a protective coating. We recommend Oculito Oil. Search OCULTO on our site. This seals the pores of the timber and creates a natural protection. Stains and marks should still be removed immediately.

### REGULAR CARE

- For regular dusting, use a dry cloth. For cleaning or in case of a spill, use a damp cloth and natural soap. Wipe in the direction of the grain. Do not use soap containing detergent or other chemicals. Dry with a soft clean cloth to prevent spotting.

### THOROUGH CARE

- To remove stubborn stains or superficial scratches, extra fine sand paper can be used. Make sure you always rub in the direction of the wood grain.
