Installation Guide

Denby Towel Warmer M17260P (plug-in version)

The Denby Towel Rack is intended for towel warming/drying, auxiliary heating or as a decorative product.

The average heat up time is about thirty minutes, but would depend on

- a) the size of the unit and
- b) the initial temperature of the unit.

Typically the unit is programmed to be on an hour before expected use and remain on for an hour afterwards.

The running cost of the towel rack, is usually similar to the running cost of lights in the same room.

Clean with a soft cloth and use non abrasive cleaners.

INSTALLATION

Do not connect heater to the network before having read and understood the following instructions.

Electrical and plumbing connections must be carried out by qualified personnel and the unit should be securely mounted to the wall in a vertical position and such that it will not fall into water if the brackets should loosen. Check with local regulations to verify whether a GFI is required or not. The following pages are to assist in installation.

In case of damages or failures of the rail/connection, the towel rail should be returned to the manufacturer or their distributor. The warranty from the manufacturer is NOT VALID in case of improper use or installation. Product designed for use in Canada and USA only.

See page 4 for detailed installation steps.

TECHNICAL SPECIFICATIONS

MODEL# **M17260**

ELECTRIC VERSION Element specifications 200W, 110V, 48" cord, UL approved. Hardwire Kit CSA-US approved. File ref: 229718

HYDRONIC VERSION Heat output 4433 BTU. 1/2" BSPT tappings. Steel towel warmers should only be used in a closed water system, incorporating a rust inhibitor.

CARE & MAINTENANCE A periodic wash using warm water and a soft cloth will retain the high quality finish of your towel warmer for many years to come. ON NO ACCOUNT should any household bleaches, detergents, abrasive polish, steel wool or similar cleaning agents be used on this product.

WALL FIXING Towel warmer brackets must be securely fastened to either masonry, wall studs or plywood board in accordance with the fitting instructions.

PACKAGING Packaged for regular UPS type shipping.

WARRANTY Frame 5 years – Heating element 5 years.

Position mounting brackets as near to each edge as possible and between the first or second cross bars

NOTE: Towel warmer *must* be installed so that electrical cord comes out of the **BOTTOM RIGHT** of the unit.

INSTALLATION STEPS

1. Check that all the installation pack contents have been received. There should be 1 item as shown below plus the towel warmer:

Brackets

2. Determine location of towel warmer near a electrical outlet. The towel warmer cord is 4 ' long. **Note: where possible, attach at least two of the brackets to a firm wall stud.**
3. Attach bracket pieces 1,2,3, and 4 to towel warmer using diagram 1 below as a guide. Typically the brackets are positioned between the 2nd and 3rd bars from the top and bottom. To allow maximum hanging space for the towel, position brackets as near to the edges as possible.

Diagram 1

INSTALLATION STEPS

5. Determine location of #6 outer rear cylinder by measuring the brackets attached to towel warmer. Attach #6 cylinder to wall with hole for #7 locking screw facing down on the bottom brackets and facing up on the top brackets.
6. Insert #4 bracket pieces (attached to towel warmer) into #6 bracket pieces (attached to wall) and fasten with locking screw #7.
7. Plug towel warmer in, allow 30 minutes for towel to heat up.
8. ENJOY!
