Introducing...

The Cascade Collection

Heated Single Rails

"Beautiful design matched with simple installation"

The Perfect Solution...

Here for the first time we bring you our unique single rail models available in all the styles found within our existing collections. Here are some of the benefits specific to our single rails...

- The same dry-line, flexible heating cable as our multi-rail models guaranteeing no leaks.
- Hidden power supply with the electrical connection through the back of the wall mount.
- No need for a bulky, expensive frame installed behind the wall.
- Install one rail, or multiple rails with no limitations.
- Our heated single rails are available from 500mm to 1000mm wide.
- All models are available with and without escutcheons, concealed or non-concealed.
- Unheated versions also available.
