# Getting started

When using the navigation software for the first time, an initial setup process starts automatically. Do as follows:

👉 Select the program language. If your preferred language does not appear on the screen, tap  /  or drag the list up or down with your finger to view all available languages. Tap  to select your preferred language. Tap  to confirm your selection, and proceed to the next page.

👉 Read the Software and Database End User License Agreement, and tap  if you agree with the terms of use.

👉 You are now asked whether you allow the software to collect usage information and GPS logs that may be used for improving the application and the quality and coverage of maps. Tap  to allow the anonymous statistics or disable this function.

👉 The Configuration wizard starts. Tap  to continue.

👉 Select the voice guidance language profile. If your preferred language does not appear on the screen, scroll the list for other available profiles. Tap any item in the list for a short voice sample.

Tap  to confirm your selection, and proceed to the next page.

☞ Set your preferred time format and units. Tap **✓ Next** to confirm your preferences.

☞ Set your preferred route planning options. Tap **✓ Next** to confirm your preferences.

☞ The initial setup is now complete. Tap **✓ Finish**.  
The application starts.

# Navigation menu

Startup screen: the Navigation menu

After the initial setup, and whenever the software is started, the Navigation menu appears. You have the following options:

- Tap  Destination to select your destination by entering an address or selecting a place of interest, a location on the map or one of your Favorite destinations. You can also look up your recent destinations from the Smart History or by entering its coordinate.

- Tap  Route Options to display the route parameters. You can view the route in its full length on the map. You can also perform route-related actions such as editing or canceling your route, setting a start point for the route, picking route alternatives, avoiding parts of the route, simulating navigation or adding the destination to your Favorites.

- Tap  More... to simulate demo routes or to run some additional applications.

- Tap  to customize the way the navigation software works.

- Tap  Show Map to start navigating on the map.

In the Navigation menu, tap . The Destination menu provides you with the following options:

- Tap  to specify an address as your destination.
- Tap  to select a place of interest as your destination.
- Tap  to navigate to a location selected on the map.
- Tap  to choose from the list of your favorite destinations.
- Tap  or  to navigate to the recent destination that is shown on the button.
- Tap  to choose from the list of all recent destinations.
- Tap  for other search methods.

# Navigating to an address

In the Navigation menu, tap , then tap . In the US, the

screen proposes only the country while in other countries you can see the city or town where you are located.

➔ If needed, change the country or the state. Tap the button showing the name of the country.

1. Use the keyboard to enter the name of the country or the state.
2. After entering a couple of characters, the list of countries and states that match the entered string appears. Together with the country, you can select the state, or select the name of the country where it stands without a state to search for an address in all its states.

➔ Outside the United States, the current city/town is displayed. This field is empty when you are in the US. Tap the button and use the keyboard to enter a part of the city/town name. As you enter letters, the most likely city/town name is always shown in the input field. You have the following options:

- Tap  to select the city/town that is offered in the input field.
- Tap  to correct your entry.
- Tap  Results to browse the list of city/town names matching your input. Select a city/town from the list.

# Navigating to an address

👉 Enter the street name:

1. Tap .
2. Use the keyboard to enter a part of the street name.
3. Tap  to select the street that is offered in the input field or tap  to browse the list of all streets matching your input.  
Select a street from the list.

👉 Enter the house number:

1. Tap .
2. Use the keyboard to enter the house number.
3. Tap  to finish entering the address.

👉 The map appears with the selected destination in the middle.

Tap another map location if necessary, then tap  to confirm the destination.

👉 After a short summary of the route parameters, the map appears showing the entire route. Wait for a few seconds or tap  and start navigating.

# Quick Find

With the help of Quick Find, you can search for a location near to a known Place of Interest. Search for the Place by its name first and then find your destination on the map. Do as follows (starting from the Navigation menu):

Tap  Destination .

Tap  Search in all.. .

Start entering the name of the Place of Interest on the virtual keyboard.

After entering some letters, tap  Results , and select the Place from the list of matching place names.

Scroll down the list if necessary, highlight the desired Place and tap  Select .

Check the details of the Place, and then tap  Select .

An overview map is displayed with the selected Place in the middle. Browse the map, and tap the map location that you want as your destination. The red Cursor appears where you tap the map.

Tap  Select .

After a short summary of the route parameters, the map appears with the selected destination in the middle. The route is automatically calculated.

Tap  Go! and start navigating.

# Navigating to a place of interest

On the Map screen, tap  to return to the Navigation menu. In the Navigation menu, tap , then tap . You are offered the following preset search categories:

- Tap  to get a list of gas stations along the route or if it is not available, around your current position or your last known position.
- Tap  to get a list of parking lots near the destination or if it is not available, around your current position or your last known position.
- Tap  to get a list of restaurants along the route, around your current position or your last known position.
- Tap  to get a list of accommodations near the destination, around your current position or your last known position.

You can also tap  and search for a place by entering its name. If none of the above is appropriate, tap  to find a place of interest at the following locations:

- Tap  to search around the current position or if it is not available, around the last known position.
- Tap  to search for a place within a selected city or town.
- Tap  to search for a place around the destination of the active route.
- Tap  to search along the active route, and not around a given point.

This is useful when you search for a later stopover that results in a minimal detour only, such as searching for upcoming gas stations or restaurants.

# An example of navigating to a place of interest

**Example:** To find a park around your destination, do as follows

(starting from the Navigation menu):

Tap  Destination .

Tap  .

Tap  .

Tap  .

The list of place categories appears. Tap  or slide your finger to browse the list, and tap  .

Tap  to browse the whole category, or tap  to narrow down your arch.

Tap any of the list items.

Check the details and the location of the place, and then tap  .

After a short summary of the route parameters, the map appears showing the entire route. Wait for a few seconds or tap  and start navigating.

# The Map screen

The Map screen is the most important and frequently used screen of the software. The Vehimarker (a blue arrow by default) represents your current position, and the orange line shows the recommended route. There are screen buttons and data fields on the screen to help you navigate. During navigation, the screen shows route information.

- At the top of the screen, you see your heading and the house numbers on left and right if you have not selected a route destination. When navigating a route, you see the next maneuver and the next street/road on your route. Tap either of them to open the route itinerary.
- Tap  to open the Quick menu with a selection of functions that are useful during navigation.
- Tap the map anywhere to explore the map around your current position. Additional map control buttons appear.
- Tap  to open three data fields on the map. Tap any of them to suppress the others. The default values for navigation (you can change them in Map settings):
  - the remaining distance to the destination,
  - the remaining time of the trip, and
  - the estimated time of the arrival at the destination.
- Tap  to open the Navigation menu.

# 'More' menu

The 'More' menu provides you with various additional applications.

In the Navigation menu, tap  More... .

-  : Visit [www.naviextras.com](http://www.naviextras.com) to get additional content, such as new maps or 3D landmarks and useful applications.
-  : Access the Picture Viewer.
-  : Access the Unit Converter.
-  : Access the clothing size converter.
-  : Access the scientific calculator application.
-  : Access the fuel consumption monitor.
-  : Access sunrise and sunset times.
-  : Access your saved trip and track logs.
-  : Access country information, such as speed limit, maximum blood alcohol level or compulsory equipment.
-  : Run the Demo and watch sample route simulations to see how navigation works, read the Software and Database End User License Agreement, or check the map and other contents of the application.

In the Navigation menu, tap . The Settings menu provides you with the following options (scroll the list to see all):

-  **Sound and Warnings** : Adjust the different sound volumes, change the voice guidance profile, or enable and set up warnings.
-  **Customize Quick Menu** : Change the function buttons in the Quick menu of the Map screen.
-  **Route Settings** : Select the type of vehicle you are driving, the road types used in route planning, and the route planning method.
-  **User Profiles** : If more drivers use PDN-621HB for navigating, their settings can be remembered by using one of the user profiles.
-  **Map settings** : Adjust map related settings: change the daytime and night color schemes, change the default zoom level, switch between 2D and 3D map, suppress buildings or change the Vehimarker.
-  **Visual Guidance** : Adjust how the software helps you navigate with different kinds of route related information on the Map screen.
-  **Display** : Turn the menu animations on or off, select a different skin for the application, or adjust the display backlight.
-  **Regional** : Change the program language, the time format, units or the time zone.
-  **Trip Monitor** : Turn the automatic trip or track log saving on or off, check the current size of the trip database.
-  **Log Collection** : The application collects usage information and GPS logs that may be used for improving the application and the quality and coverage of maps. Here you can enable or disable collecting these logs.
-  **Start Configuration Wizard** : Modify the basic software parameters set during the initial setup process.
-  **Reset to Defaults** : Delete all saved data and reset all settings to their factory defaults.
