

# UNIQUE HAND FORGED BRITISH MADE FIRE PIT

PERFECT FOR OUTDOOR COOKING AND BBQ'S  
MADE FROM 3MM THICK STEEL TO ENSURE LONGEVITY  
A SHOWSTOPPING PIECE FOR ANY OUTDOOR SPACE

## USE

- For best results make a large fire with a generous amount of logs at least half an hour before use.
- Always use seasoned logs to reduce smoke.
- During cooking push the burning logs to one side and cook over the hot embers, you can add charcoal for additional heat but this is not usually necessary.
- After cooking remove the grill or rack and add more logs onto the fire and continue to enjoy the warmth of your fire pit.

## CARE

- Our fire pits are made from mild steel with an oil finish. They will eventually oxidise and become a deep autumn colour. This won't impact on their long term durability.
- They can be rubbed down with a wire brush and oiled, however it is fine to leave them outside and allow them to take their natural course.
- It is not essential to put your fire pit away during the winter, it can happily survive left outside all year round.

Please be aware that as the fire pits will oxidise, rust can occasionally mark stone terraces. The fire pits get extremely hot and therefore if placed on lawns will scorch the grass underneath. Children should be supervised by a responsible adult at all times.
