XARIOS®

The Xarios® range is a direct drive refrigeration unit demonstrating unique versatility for vans and trucks. Its design enables transportation of fresh and frozen goods, in single or multi-temperature applications, in vehicles with box volumes from 8 to 40m³ and is available in road only or road and standby versions.

COLD CHAIN RESPECT

Featuring R452A refrigerant, Xarios® offers a large range of capacities covering temperatures from -20°C to +30°C. Supported by an extensive lineup of ultra-slim evaporators, including the MXV 850 vertical evaporator, multi-temperature configurations are widely available for multi-product deliveries.

OPTIMISED COST OF USE

Balancing performance and cost of operation, the Xarios® range offers simple and rapid installation, light weight evaporators to optimise load space and enhanced accessibility for reduced maintenance time.

DRIVER'S COMFORT

To limit the impact on the community and improve the driver's comfort, the Xarios® range shows low noise levels. Eventually, the cab command is easy to operate and enables an automatic selection of road or road and standby mode.

The units' condensers and evaporator skins are fully recyclable.

Xarios 500 / 600 / 600MT

Xarios 300 / 350 / 350MT

Xarios 150 / 200

EVAPORATOR RANGE

		3430	2030			MXV850	17	750		

* Condenser section only. ** Ambient temperature at +30°C (per A.T.P. procedure).

*** Not recommended for deep frozen application.

All units running on R452A refrigerant.

ACCESSORIES

- Road compressor
- Road compressor mounting kit
- Drain water heater for deep frozen application
- Extension connection set for flexible evaporator positioning
- Door switch for doors openings
- Condenser roof mount accessories for Xarios 150 to 350MT
- Voltage reducer 24 Vdc for trucks
