

RING SIZE GUIDE

If you need assistance with the rings size guide, feel free to contact us on our live chat customer service on www.stillwithyou.dk or send an email to info@stillwithyou.dk

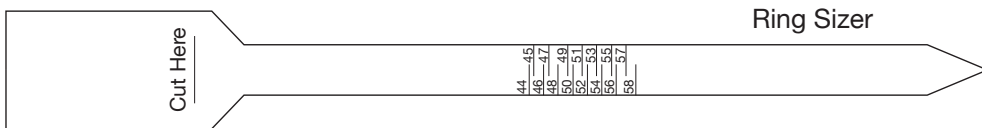

Set your printer to print actual size and print the document. To be certain that the page is printed 1:1, make sure that the line below measures 10 cm / 3.94 inches on a ruler.

Method 1: Finger Measurements

Note that your finger should be at a normal body temperature, or the measurements could be misleading. The ring sizer shows a comfortable fit, so if you prefer a firmer fit, we recommend that you order two sizes smaller than what the ring sizer shows.

1. Cut the ring sizer along its border and slice the "Cut Here" mark open.
2. Wrap the ring sizer around your finger with the numbers pointing outwards.
3. Lead the peak end through the slot you sliced earlier, and tighten the sizer around your finger: your ring size is the number displayed along the slot. The fit should be snug, comfortable and easily fit over your knuckle.

Method 2: Ring Measurements

Place one of your own rings onto one of the circles. You want it to barely cover the black circle, so that you can see a very thin black line all the way around the inside of the ring.

If you are between sizes, we recommend choosing the smaller size.
