

Always wear gloves when handling paint or chemicals.

Properly prepare your rusted surface by removing loose rust and contaminants.

Using a clean rag, wipe off any dust, or residue from the preparation process.

Open the CORE product carefully to avoid spills.

Attach the plastic lip guard for easy pouring and prevent excess build up in the can lip

**CAUTION: DO NOT SHAKE** the can vigorously! Stir the product to properly mix. Shaking can cause the product to expand in the can

Pour the product to be used into a separate container and re seal the unused portion remaining in the can. If you leave open it can skin over.

**CAUTION:** If the can is sealed with paint in the lip it will seal it shut and will be very hard to re-open.

Product can be brushed, rolled or sprayed. For Brushing use a china bristle brush. For Rolling use a urethane core roller. If Spraying always wear a NIOSH approved respirator. Sprayed fumes are hazardous.

After 3 hours of drying time prepare your topcoat for application.

Apply your chosen color of topcoat by either brush, roll or spray.

Enjoy your finished project for years to come.

Items needed for best results:  
Gloves, Can Opener, Scotchbrite Pad for Metal, Stir Stick, Paint Can Lip Guard, Paint Brush, Wiping Rags and Mixing Cup.
