o-rings, was		esting on proper fuel and setting to	ild, and replacing of these parts: filte of factory specs. This is recommended		
Bimba cylin and updatir new one. T	der, needle and nozzle, flame retong to digital temperature control. F	ention head, solenoids, new oil li Remaining components will be tra hat are eight years or older and u	ng: a new 3/8" 800 watt heating elemnes, a module cover, pump rebuilt, fansferred from your old module ontoup to 15,000 hours. All new compon	filter, \$1,850 the (new	

Pricing: Now is the time to get your burner reconditioned or purchase a new one as it is INOV8's slow time. Use the list to the right to add "ala cart" priced updates to your burner rebuild.

Complete this form choosing your rebuild option by checking to the left in the space provided, sign and return it with the burner or email back to INOV8 at sales@inov8-intl.com. If this does not accompany the burner you will be contacted and required to fill it out at that time.

Parts: As in the past, if parts fail during testing they will be replaced and their cost added to the basic price. Parts that do not fail during testing are not replaced BUT do have the risk of failing after returned to you. If you do not want that risk, please select the Deluxe Rebuild and all components that may fail because they've reached their life expectancy will be changed out. Parts that are replaced due to age but are not failed will be returned to use for backup. There is a six month warranty on replaced parts and workmanship, but no warranty on parts that are not replaced.

Shipping Details: The same shipping practices need to be followed: plug oil lines, do not send the air regulator, bracket or airline, burner plate, extra fittings on the pump or on vapor eliminator. First place the burner into a large plastic bag, then add packaging around the burner. Take extra care in packaging the burner as INOV8 does not cover shipping damage. DO NOT USE PACKING PEANUTS! As always, completed burners must be paid prior to their return. **NOTE address: 306 N Star Road, Holmen, WI 54636**.
