The set we are using one skin and internally **AN208 Set of 3**

1. HAMPL Fungi 208-1 30ml
2. HAMPL Fungi Skin Rinse 208-2 200ml * topical
3. HAMPL Internal Fungal 283 50ml

**NATUROPATHIC SUPPORT**

**Systemic infection**

means that a fungal infection is throughout the body in **organs and other body tissues** and may have some manifestations **on the skin**. Internal means that the infection is largely confined to the digestive or reproductive tract. Sometimes treating the infection in the gut removes the source enough such that systemic infections are resolved. Sometimes a fungus has such a foothold in the tissues (usually due to toxin involvement) that systemic measures are necessary.

**Vitamin C**

fights fungus directly as well as helps remove toxic metals in the body which may contribute to the problem. Some say systemic fungal infection is most prevalent in those who harbor metal deposits, especially mercury, in their body and that it may be impossible to cure unless they are removed or at least reduced. We prefer a non-acidic product, Sodium Ascorbate Vitamin C powder is also good.

**Oregano oil**

*(Oregano Oil that is sold from North American Herb and Spice Co.,)* is **pre-diluted**, can be taken 3 – 5 drops (up to 10) drops mixed in pets water bowl. *Can also add 3 to 5 drops into the HAMPL Internal fungal herbal diluted mix. Oregano oil is one of the most effective antifungal supplements, followed by olive leaf extract. Oregano oil can be used internally or externally, unlike tea tree or camphor oils which should only be used externally.

**Colloidal Silver**

is usually helpful fighting fungal infections. A high dose regimen is 3 tsp mixed in with herbal dilute mix for each dosing.
Then this how to rid this YEAST infection that is also internally “systemic fungal immune weakness”

The fungal yeast is in your tummy to stay for decades...

Once you get too much yeast it will not leave on its own. Not in a year, not in ten years, not in your lifetime. And as long as it is there, it’s going to win sooner or later. So here is what you can do for an animal who has had or still has skin allergies, ear infections, smelly odour or ever had antibiotics. (or for yourself)

Here is the powder I like to use for myself and my pet’s.
New Life Colostrum Plus Immune Formula

HAMPL Internal fungal herbs 208 50ml

HOW TO PREPARE HERBAL MEDICINE
Special diluting instructions - for Cat, Toy dog, Bird, Rabbit or other small animals.

NOTE: Some Felines are very sensitive to herbal medicines strong taste, (symptoms will show some over salivation foaming, it will settle within a few minutes. If you have a sensitive cat, then dilute with herbal mixture with twice as much water).

Small animal, cat, toy dog, rabbit:
Add 1/4 teaspoon of slippery powder and 1 teaspoon into 1/2 cup of hot water (from kettle) stir, let cool. Oral syringe side of mouth small sips at a time until 1ml is taken.(0.5ml rabbit) Or try & mix it well into meals.

Small dog or Med size dog: 40 drops.

Med-Large Pet or Animal: 50 drops. dilute into some (unsweetened apple sauce) oral syringe a dose side of mouth. Small sips at a time. Or mix into some plain sardines and hand feed.

Horse: 15 drops in apple juice oral syringe it.

Twice to four times a day depending on severity, stop when well.
HAMPL Topical Fungal Skin Herb Rinse 200ml

Instructions: Dilute before “Topical” use

Med to Large Canine, Horse:
Mix 4 Tablespoon to approx. 200ml of water. Can put in spray bottle or just pour over animal’s affected areas. Pat on with cotton ball around face and eye area if affected there as well.
Toy Dog: Mix 1 Tablespoon to 100ml of water, and pour over pet’s body as a Rinse.
Do not Rinse off. Completely Safe if licked off fur.

“Severe Infection”

CANINE (DOG) treatment dosing guide

TREATING ACUTE “SYSTEMIC” FUNGAL INFECTIONS

If your pet is vomiting or unable to hold solids foods, we suggest this method in liquid dilution oral dosing so it goes into the blood stream straight way and not going through and processed in the stomach.

REPEAT ORAL DOSING: repeat every 1/2 hour Repeating for 4 - 6 treatments.

Do this short dosing sessions twice to three times a day for the first day. Following day you should be seeing improvement. If so reduce to repeat dosing hourly. 4x daily dosing.
Continue until improvement again, then reduce to 40 - 60 drops 2 – 3 x daily for longer (1 month) until all health has been fully restored. Then upon further improvement, you could then add the herbal dose in some sardines (tin of plain sardines in spring water) and hand feed the piece with herb dose in it – repeat three to four times a day for as long as needed and infection is clear.

NOTE: Results should be seen within less than 24 hours. Detox may be seen, discharges from skin, loose stools etc. this is a good sign and allow this to continue. No need for antibiotic drugs, as this herbal form is a form of antibiotics for bacterial as well as fungal. If too strong tasting for your pet, add more liquid to dilute a bit more. Or try adding some water with some well mashed sardines. So its still almost liquid dosing.
Chronic Infection Internal dosing
TREATING CHRONIC “SYSTEMIC” FUNGAL INFECTIONS. Can add drops to meals or sardines and hand feed – three times a day for 2 months.

Applying the skin fungal treatment can be applied as many times a day until red, smelly, itching reduces and fully healed would be when internal organs are treated and chemical detox and fur and skin, energy and wellness will be restored. It can take months but you will see improvement especially the emotional (behaviour ) level is seen first.

In conjunction with:
Along with Probiotics and Colostrum, Vitamin C, homeopathic Chemical Detox 110 Set, Neem powder, Activated Charcoal added to meals.
Add Colloidal Silver to water dish ongoing for 3 – 4 months.
AVOID - Antibiotic drugs and other toxic drugs, sprays and products.

Fungal Infection (i.e. mold exposure, damp areas etc)
Use Neem powder (Organic India Neem Capsules - leaves, flowers – from iherb.com) * add 1/4 powder from the capsule in meals three times a week with a pinch of “Activated Charcoal” as well. Continue for a month. If it’s too strong do only once a week or every second week (. causing lethargy)”Activated Charcoal” can pull out 4,000 toxins a day. 
Mold (fungal) infections .. can be caused from exposure to moldy damp enclosures or rooms ...
.. can cause sickness - which includes memory loss, headaches, nosebleeds, nausea, diarrhea, bronchitis, sinus infection, asthma type trouble breathing. .
Note: Neem herb also helps detox heavy metals (vaccine toxins), and is also a parasitic (wormer).

STEAM Therapy (if sinus or lung congestion)
Put your pet in the shower room on a mat, towel or your cozy dressing gown, several times a day when having showers and run hot water in the shower for 5-10 minutes each time. Don’t let them get wet at all.
Did you know the "Skin" is largest organ in the body.
Common Symptoms in animals maybe seen: … red, hot, itchy, and smelly or non smelly odor, sores. Allergies are overreactions of the immune system. The immune system is (from the holistic point of view) an extremely complex system, comprising the white blood system (lymphocytes, granulocytes, macrophages, mast cells), as well as the entire system of mucous membranes. It also is closely involved with the normally present bacterial colonies in the mucous membranes.

Clearing/detox from previous or past toxins and allergy type foods is essential for acute or long standing conditions. Further cortisones and antibiotics, vaccines and other poisons (heartworm and wormer, flea products) are further depletion the immune system and causing acute aggravations and inflammations of these animals that are immune depleted.

A pet with chronic diarrhea and gas or skin/ear infections, cats with chronic or acute urinary tract infections, are most often suffering from a allergy reaction to foods and chemical drugs. How our animals become susceptible to having acute or chronic inflammation reactions once again it is due to chemicals that have caused a damage and weakened immune system.

So holistically, we need to work on building and repairing the immune system. How we do this is to avoid further chemical poisons and stresses to the body/organs. Provide a home prepared diet that is free of chemicals and allergy foods. AVOID All commercial foods/kibbles, have corn, wheat, sugars, chemical dyes and colorings, with beef and by products.

Causes

Allergens -- Allergies can be caused by the most varied of substances and materials.

Products like: 
- Chemicals (vaccines, heartworm, wormer, flea products, dog wash, dog sprays, house sprays, ALL commercial foods and dry foods(kibble), and so on. 
- As all these substances are chemicals, with poisons and toxins and artificial dyes and preservatives that ARE harmful to the body. 

Food Products like: 
- Beef, wheat (pasta), yeast products, pork, fish, corn, tuna, carrots(non organic) spicy human foods. 

Other allergens that are less known – but must take into consideration - peas, beans, nuts, shellfish, citrus fruits, etc pineapple, tomatoes etc. Cabbage, chard, broccoli, cauliﬂour, mushrooms and spices.

Toxic allergy reaction foods "if given a lot" should be avoided are:

- chocolate, grapes, onions, some houseplants, house sprays, chemical dog washes, fleas sprays, flea bombs, round up, other weed and slug killers (although some brands say pet friendly) they do still kill and highly toxic. 
- Vaccines, heartworm and flea, worming drugs, mange drugs, heartworm treatment drugs – are all insecticide chemical poisons. We often see and treat animals that start having violent seizures are vaccines, wormers, and the occasional anesthetic toxic reaction has also been noted.
Flea Prevention and Relief – Naturally.
Borax Powder from the supermarket – sprinkle each room – which pet is outside. Then vacuum up. Repeat once a week if needed. Also sprinkle outside if needed. As fleas breed in the carpet and outside in the sand or soil. (not on the pet)

Allergy of pollen, grass and dust mites. Add 10mg of B complex tablet (crushed) in daily meals.

Fungal (yeast) Infections
Importance of restoring and maintaining beneficial bacteria, the so-called "friendly flora" in the intestines. These bacteria are killed off by chlorine in your water supply, by Veterinary or Doctor’s anti-biotics, by preservatives in food and by alcohol, and by other factors. When the beneficial bacteria are gone, "bad" bacteria, molds, and yeasts (also known as Candida) can then rage out-of-control.
Immune system overload, malnutrition, skin and ear problems, and many other problems shortly follow this.
Afflicted by candidiasis, the hidden curse. Candiasis, an overgrowth of yeast (Candida) in the body, can be a key contributing factor in causing or worsening:
* Food allergies
* Digestive problems
* Sensitivity to tobacco and odors
* Other immune-related disorders, yeast infection in ear
* Headaches
* Depression
* Cancer
* AIDS
* Skin rashes
* Joint and muscle pain
* extreme fatigue (known as CFS in humans)
The key to overcoming many such conditions is to undo the actions which caused them to occur in the first place, while restoring balance to the body. **EG Avoiding….. all dairy (goats milk is fine), sugar foods and yeast products and foods, avoiding antibiotics (using alternative herbal infection fighters if needing antibiotics)**

The gastrointestinal tract’s balance of beneficial flora is most commonly disrupted by:
* Antibiotic usage
* Excessive sugar consumption
* Stress
* Drinking chlorinated water
* A diet consisting chiefly of processed tin foods
* Prescription anti-inflammatory drugs and painkillers
* A diet high in red meats or rich, fatty foods.
Many people and animals lack sufficient friendly bacteria in their digestive tracts, and are often overrun with unfriendly bacteria and yeasts at the same time. These people/animals are in fact being simultaneously poisoned and starved (malnourished). The effects of the imbalance of intestinal flora are all too often seen in the failing health and vitality of millions of middle-aged and elderly individuals. However, if you have had antibiotics, a high stress level, have been exposed to chlorinated water, have any of the signs or symptoms of ill health below, you may have a bacterial imbalance beyond the ability of such foods to resolve.

If you or pet have:
* Chronic fatigue
* Frequent diarrhea
* Frequent intestinal gas
* Frequent constipation
* Poor immune response
* Chronic bladder infections
* Chronic vaginal infections
* Allergies
* Skin conditions
  (e.g skin odour (fungal), red, itchy, dry, scaly, sores, loss of fur due to excessive scratching.
* Rapid onset of osteoporosis
* Vitamin B deficiencies
* Dairy product sensitivities
* Chronic bad breath

Then this how to rid this YEAST infection that is also internally “systemic fungal immune weakness” The fungal yeast is in your tummy to stay for decades ... Once you get too much yeast it will not leave on its own. Not in a year, not in ten years, not in your lifetime. And as long as it is there, it’s going to win sooner or later.
