No action shall be taken involving any personal risk or without suitable training.

4.2 Most important symptoms/effects, acute and delayed
No known significant effects or critical hazards.

4.3 Indication of immediate medical attention and special treatment needed, if necessary
Notes to physician: Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments: No specific treatment.

Protection of first-aiders: No action shall be taken involving any personal risk or without suitable training.

Eye/face protection
Safety eye wear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side shields.

Skin protection
Chemical-resistant, impervious gloves complying with an approved standard can be worn at the users discretion.

Body protection
Appropriate footwear and any additional skin protection measures should be selected based on the task being performed.

Respiratory protection
None needed.
