

AquaClear™

Liquid

A blend of environmentally beneficial microorganisms to restore balance in natural and man-made surface waters.

A safe, natural method to help return your waters to a healthy balance. AquaClear Liquid uses nitrogen and phosphorus present in water and bottom sediment to improve water clarity, reduce organic buildup and eliminate odors. Will not affect live growth. Will digest excess nutrients in the water and sediment. Works in aerobic and anaerobic environments. As nutrient levels drop, equilibrium returns to the water and microbe levels also drop. Once balance is achieved monthly maintenance will ensure a continued high level of water quality.

AquaClear Liquid WILL:

- Reduce and prevent black anaerobic soil
- Reduce and prevent decaying organic matter
- Eliminate odor due to organic buildup
- Increase water clarity improving aesthetics
- Improve water quality and ensure good algae balance
- Promote a healthy aquatic environment

AquaClear Liquid WILL NOT:

- Harm fish, animals, birds, plants or humans
- Control algae blooms
- Limit water uses including swimming, fishing or irrigation
- Work below 40°F or above 140°F
- Harm fiberglass, aluminum or wood
- Deplete oxygen levels

AMOUNT TO USE

Portion Treated	Low Stress Condition/Maintenance	High Stress Condition
Entire Body	1 gallon/acre-foot	2 gallons/acre-foot
	4 oz./10,000 gallons	8 oz./10,000 gallons
Half or Less	2 gallons/acre-foot	4 gallons/acre-foot
	8 oz./10,000 gallons	16 oz./10,000 gallons

For entire body of water use 1 gallon per acre-foot. For half or less of entire body of water use 2.0 gallons per acre-foot. Under high stress conditions such as drought, extended hot weather, following heavy rains or during algae blooms, double this amount. Use weekly for 4 weeks or until desired water quality is achieved. Continue monthly maintenance application to ensure a high level of water quality.

Dilute AquaClear Liquid with 9 parts water to make 10 gallons of solution per gallon of concentrate. Spray or pour into the water. The microorganisms quickly begin to consume nearby organic material. Natural currents, wind and wave action will distribute microorganisms uniformly within a few hours.

The microorganisms in AquaClear Liquid are confirmed to be a non pathogenic, non-genetically manipulated, non-harmful species of environmentally beneficial microbes. These natural microbes are typically present in all known regions of the world including surface water and bottom sediments.

Active Ingredients: Bacillus spores/Vegetative microorganisms: ... 20.0%
 Other Ingredients: 80.0%
 Total: 100.0%

Net Contents 5 gallons

DO NOT TAKE INTERNALLY. AVOID EYE CONTACT. WASH HANDS THOROUGHLY WITH WARM WATER AFTER HANDLING.
