Water Weed Rake Assembly and Use Instructions

1. Select the **rake head** (A). Pivot the **braces** (B) into position as shown.
2. Insert the **handle** (C) into the rake head aligning the holes. Secure these together with the short bolt and nut.
3. Align the holes in the braces with the holes in the top and bottom of the handle and secure with the long bolt and nut.
4. Attach the **foam float** (F) with the two wing nuts and washers to the rake head.
5. When using the rake to remove floating weeds, remove the adjustable extension and attach the **cap** (D), foam float and rope.
6. When using the rake to remove lake bottom weeds, remove the cap and insert the adjustable extension to the desired length. Place the **eye-bolt** (E) up through the hole and tighten, then detach the foam float and rope.
