

Instructions:

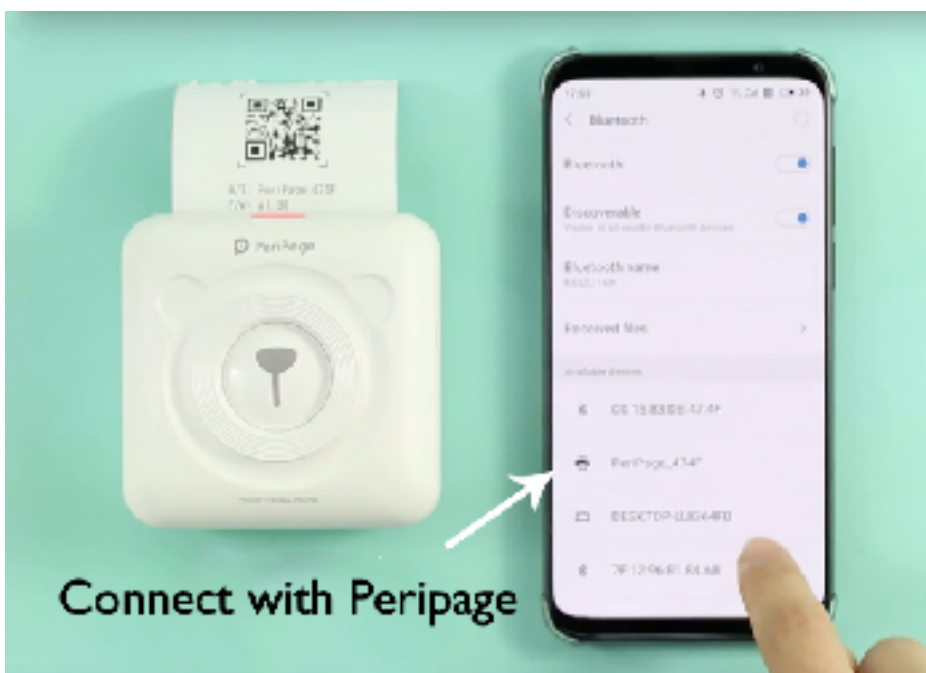

Step 1: Download the Peripage app in the Appstore, Android Market or Windows store depending on your device.

Step 2: Turn on the Pocketprint by pressing the on button for 3 seconds.

Step 3: Double-click the on button to get the connection information. Switch on the bluetooth on your phone, open the PeriPage app and connect to the printer.

Step 4: Go to the "Photo and text menu", write text or add a photo. Go to "Print preview", here you can check how it comes out of the printer. It is possible to print out banners, labels, notes and web pages. There is also the "Text recognition" function that recognizes text in a photo and prints only that text. Then click on "Print" to print the chosen design / photo.

To change paper: Press 2 fingers to the left and right of the logo on the top of the Pocket Printer to open it. Remove the empty roll and place a new roll, close the printer and press again with 2 fingers at the top for a good closure.
