OAKLEY

MILITARY

WE DON'T TEST THE BOUNDS OF REALITY, WE SET THEM

You are not average. You have developed a special set of skills to defend us. You put the needs of others before your own and are willing to make the ultimate sacrifice. We are indebted to you, but more importantly, we support you. We push the boundaries to scrutinize and perfect your gear to ensure your safety, performance and comfort. You are our protectors, and your courage inspires us to exceed expectations and provide you with the best gear available.

EYEWEAR TECHNOLOGY

HIGH DEFINITION OPTICS® (HDO)

A combination of technologies and patented innovations that give you clearer, sharper and more accurate vision. HDO® virtually eliminates the distortion common in high-wrap sunglasses.

- REFRACTIVE POWER-Conventional lenses can magnify images. HDO® precision gives you more accurate vision across the entire field of view.
- ASTIGMATISM-Ordinary lenses can't focus all light waves to or into the part of your eye that does the seeing. With HDO®, you won't have the blur of inferior optics.
- PRISMATIC POWER-With regular lenses, objects aren't really where you see them. HDO® offers a truer visual image, and it helps ensure each eye has the same image so your brain won't have to work overtime.

IMPACT PROTECTION

Visual impact isn't just about looks. Our performance sunglasses meet and exceed the impact-resistance standards of the American National Standards Institute (ANSI).

- For high-velocity impact testing, a quarter-inch steel pellet is blasted from a pneumatic cannon at 102 mph/164 kmh.
- The high-mass impact test uses a metal spike (weighing more than a pound/half a kilo) dropped from over four feet.

BALLISTIC RESISTANCE

- MIL-PRF-31013-3.5.1.1 ballistic resistance. The ballistic resistance of the spectacles shall be such that they will pass a Vo test using a 0.15 caliber, 5.8 grain, T37 shaped projectile at a velocity of 640 to 660 feet per second when tested as specified in 4.4.1.1.
- MIL-DTL-43511-3.5.10 ballistic resistance. The ballistic resistance of the lenses shall be such that they will pass a Vo test using a 0.22 caliber, 17.0 + 0.5 grain, T37 shaped projectile at a velocity of 550 to 560 feet per second when tested as specified in 4.3.5.

PHOTOCHROMIC

- Our photochromic lenses help you adapt to changing light conditions so you can always perform at your best.
- Your lenses won't be too dark when the sun pulls a disappearing act or too light when it knifes through the clouds.

UV PROTECTION

- Oakley Plutonite® filters out 100% of all UVA, UVB and harmful blue light up to 400nm.
- The lens material itself blocks UV, so you don't have to rely on a thin surface coating that can wear away or become scratched.
- Our optical technologies allow for lens curvature that improves protection at the top and sides of your eyes.

OAKLEY HDPOLARIZED

- We fuse the polarizing filter at the molecular level. Our competition uses a cheaper "sandwich" method that can result in haze and optical illusion.
- Oakley provides an unmatched array of lens options including performance tints, Iridium® lens coatings that balance light transmission for tuned vision, HDPolarized lenses, gradient lenses, and photochromic lenses.
- Oakley HDPolarized lenses block 99% of reflected glare while offering the proven clarity and performance of High Definition Optics®, ensuring enhanced visual contrast and improved depth perception.

PLUTONITE® LENS MATERIAL

- Lightweight Plutonite® lens material offers superior comfort, clarity and protection against impact and ultraviolet radiation. Maintaining the proven safety characteristics of Oakley eyewear, the impact-resistant material blocks 100% of all UVA, UVB and harmful blue light up to 400nm. Plutonite® is the only lens material able to achieve the performance standards required by Oakley's digital design and production technologies.

AVAILABLE WITH OAKLEY AUTHENTIC PRESCRIPTION LENSES

- Oakley can custom build eyewear with prescription lenses exactly to the doctor's orders. Take advantage of the quality and innovation of a specialty lab created for Oakley dealers. It's the only way to maintain the integrity and warranty of the Oakley sunglass and frame. Numerous lens options are available, including our polarized and progressive lens technologies, and all lenses feature the unbeatable clarity of Oakley High Definition Optics®.

BALLISTIC OPTICS

SI BALLISTIC M FRAME® 3.0 ARRAY

(00)9146-(03)

- Thin stem technology enables compatibility with over-ear hearing protection/communication systems
- Advanced anti-fog and anti-abrasion performance
- Lenses are made from Plutonite® Oakley's high-purity optical grade polycarbonate featuring Oakley HDO® with Polaric Ellipsoid™ technology
- All lenses meet or exceed optical requirements per ANSI Z87.1-2003 & 2010 and EN 166-2001 Class 1
- System meets or exceeds high-mass and high-velocity impact requirements per ANSI Z87.1-2003 & 2010 in addition to Ballistic Fragmentation impact standards per MIL PRF-31013, Clause 3.5.1.1
- Lenses block all UVA, UVB and harmful violet-blue light up to a 400nm wavelength
- System features quick, tool-free lens change
- Full compatibility with helmet-mounted night vision devices
- Full compatibility with MICH, ACH, LWH, CVC, FAST, Crye Precision™ and Ops-Core® helmet systems
- Chemical- and impact-resistant O Matter™ frame material
- Oakley Rx carrier system available
- Ultra-lightweight design (1.05-ounce total weight)
- Protective laser lens available*
- Adjustable retention strap available

SI BALLISTIC GOGGLE 2.0 ARRAY

(017)035-07

- System features a low-profile design with minimized facial standoff
- Low-profile, flame-resistant, quick-release retention strap system with anti-slip tack strips
- Advanced anti-fog and anti-abrasion performance
- Lenses are made from Plutonite,® Oakley's high-purity optical grade polycarbonate featuring Oakley HDO® with Polaric Ellipsoid™ technology
- Best-in-class field of view
- Complies with ANSI Z87.1-2003 & 2010, MIL-DTL-43511, EN-166 BT K and U.S. Army MCEPS
- Complies with MIL-DTL-43511 ballistic impact resistance requirements in all lens configurations
- Lenses block all UVA, UVB and harmful violet-blue light up to a 400nm wavelength
- Full compatibility with MICH, ACH, LWH, CVC, FAST, Crye Precision™ and Ops-Core® helmet systems
- Fully compatible with helmet-mounted night vision devices
- Lens-locking slide improves lens retention while easing lens changing in the field
- Low-profile, moisture wicking fleece face foam
- Oakley Rx carrier system available
- Ultra-lightweight design (3.7-ounce total weight)
- Protective laser lens available*
