

Instructions for Use

- I. **DESCRIPTION**—The AT-MCRD PRO is a small, light, and rugged reflex sight utilized for quick target acquisition. The AT-MCRD is designed for use with two eyes open, which greatly improves target acquisition speed and situational awareness.
- II. **BATTERY**— To install or replace the AAA battery, remove the battery cover on the rear top by twisting the cap. Remove the installed battery and replace with a new AAA battery, positive (+) side in first. Replace battery cover and fully tighten. For normal use of various settings, battery will last 1,000 hours.
- III. **POWERING ON/OFF & BRIGHTNESS SETTINGS**—Turn power on, turn knob from 0 setting to your desired brightness. To power off, return the dial to 0 setting. To cycle through the eleven manual brightness settings, turn dial reach your desired brightness level.
- IV. **WINDAGE & ELEVATION ADJUSTMENT**—Adjust elevation and windage dials with 1/2 MOA clicks. Adjust the windage and elevation as needed to achieve zero using a flat head screwdriver or similar tool. Do not overturn windage or elevation adjustments.
- V. **WARRANTY INFORMATION**—ATIBAL’s number one priority is exceptional customer service. ATIBAL warrants your sight to be free from defects in materials and workmanship for two years from date of purchase. All costs that are associated with the product shipment will be incurred by the owner. ATIBAL products, to be refunded or replaced under the warranty service, must be returned in original packaging with original accessories and must include your completed Return Authorization Request Form.
