

## MYSHROOMS ENERGY

*MyShrooms Energy* is a powerful combination of Cordyceps and Vitamin B12. Cordyceps has been used by traditional Chinese herbalists for its energizing and apoptogenic properties for centuries. It has been used in Asia to increase oxygen uptake for strenuous and higher altitude activities. Athletes, and physical fitness enthusiasts, have traditionally used cordyceps to support higher stamina and endurance levels. Cordyceps supports many areas of health with research focused on energy production, respiration, libido, kidney and adrenal health. With naturally occurring B-vitamins, it is a perfect blend to include Vitamin B12 with its diverse functions in the body. B12 is involved in the maintenance of the nervous system, red blood cell production, energy metabolism and the proper functioning of our brain, heart, liver, and kidneys. Combined they are essential for optimal health, wellbeing, performance, mood, vitality and energy.

**Ingredients: Per recommended daily dose (2ml)**
