RING SIZER

IMPORTANT NOTE: Before printing, make sure your printer settings are set to print this page at 100%. scale.

After printing this page at 100% scale, place a ring that fits you on the circles below. Make sure the black circle is completely visible within/inside your ring. This will be your correct ring size. To double check, try placing your ring on the next larger size, you should not be able to see the entire black circle.

If you are between sizes, we suggest going with the next size up. For example, if you are a 7.5, we would suggest going with an 8.

4	5	6	7

8	9	10
