Illustrated installation instructions		Illustrated installation instructions		

The front turn signal lights style varies by kit:

7101 6-LED

The front LED turn signal lights are two sets of 3 individual clear lens lights, ¾" round. These lights function as a white running light, and then flash amber when the turn

signal is activated. Note: The running light feature can be disabled, if preferred.

7104 Headlights with Accent Turn Signal Lights

Replace the Polaris stock headlights with the Ryco Moto 7001 RYCO MOTO Headlights with Accent Turn Signal Lights for a WHITE running accent light, like the stock headlights, that then flash amber when the turn signal is activated, unlike the stock headlights.
