RE **Jūv**ENATE WELLNESS + PRODUCTIVITY

JÜVTM

Flexibility and collaboration inspire creativity and innovation. Ergotron Contract delved into these topics and discovered underutilized work areas where height-adjustable surfaces could support modern environments founded on movement. That's how the JÜV product family was born.

As organizations respond to workspace trends, they are challenged to respond to the needs of a diverse and ambitious workforce. We set out to create a product line that fuses captivating aesthetics with unexpected functionality through:

Integration into architectural environments or traditional panel systems

Quick collaboration that is 8–10 times faster than an electric desk

Vertical movement with 26" (66 cm) of height adjustment

Controlled and concealed power and charging accessibility at your fingertips

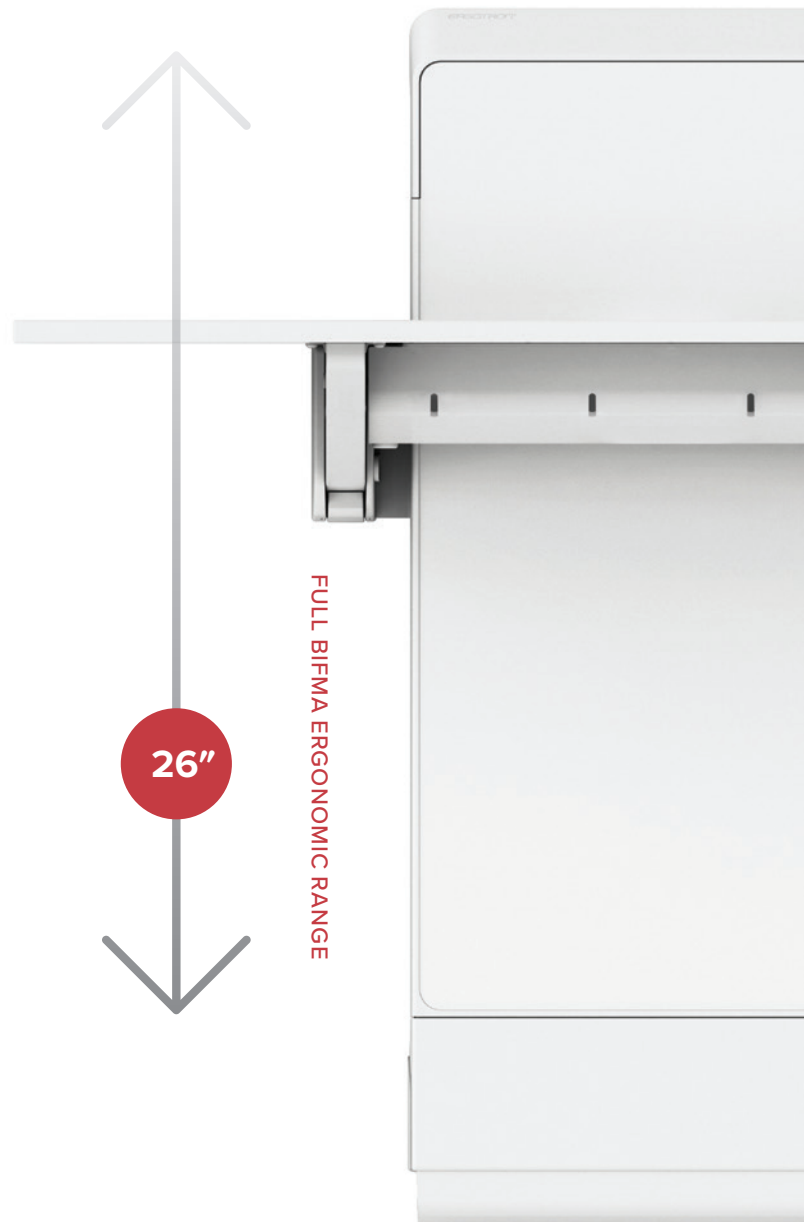

JÜV WALL

The award-winning JÜV Wall is a catalyst for movement. The non-electric, adjustable surface provides the full BIFMA ergonomic range for comfortable sitting or standing. Controlled and concealed cable management means no more tangled mess of cords that disrupt clean lines.

The wall-mounted workspace reclaims valuable space by flipping down the worksurface when not in use. With no floor supports, it provides ample legroom and additional space for storage or accessories.

FULFILLING WORKSPACE TRENDS AND
INDUSTRY DESIGN NEEDS WILL ENABLE
ORGANIZATIONS TO THRIVE.

Organizations are becoming more sophisticated and productive as technology and people intersect.

POWER AND CHARGING ACCESS
SUPPORTS MOBILE WORKERS
WITHOUT THE CLUTTER.

INTEGRATED MONITOR RISER
ACCESSORY PROVIDES MORE
ADJUSTMENT.

JUV PANEL

Create office designs that inspire movement with JUV Panel by Ergotron. With no floor supports, it provides ample legroom and additional space for storage or accessories. JUV Panel is adaptable to a variety of panel systems to make the most of any space. Customizable options such as an integrated monitor riser tailor designs for each individual. This sustainable solution transforms traditional panel systems into a dynamic modern office.

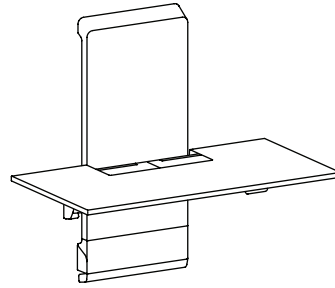

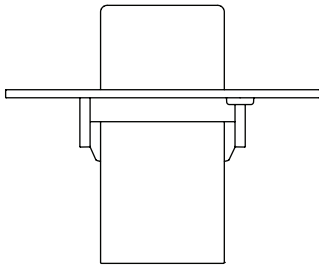

A HUMAN-CENTERED APPROACH HELPED IDENTIFY EXISTING LIMITATIONS SO THAT WE COULD DESIGN A PRODUCT THAT IS BEAUTIFUL, USEFUL AND SOLVES USERS' NEED FOR MOVEMENT.

— John Blomstrom, Lead Furniture Designer
